LIFE EVENTS

Events occurring in the life and environment of the subject. Life threatening events are events that have caused, or had the potential to cause, death or severe injury. The events should be those in which people actually died or were seriously injured and/or property was extensively damaged, or those events which had the potential to have these outcomes.

MOST EVENTS SHOULD HAVE BEEN NOTED IN THE INTERVIEW BY THIS POINT. FOR EACH EVENT THAT OCCURRED, ASK ABOUT ATTRIBUTION AND PAINFUL RECALL. IF PAINFUL RECALL PRESENT AS ABOUT AVOIDANCE, AND HYPERAROUSAL.

Attributions: Subject states that life event has contributed to a problem or symptom already identified. Painful Recall: Subject experiences unwanted, painful and distressing recollections, memories, thoughts, or images of life event. May include repetitive play or trauma-specific reenactment. Avoidance: Subject avoids situations, thoughts, or feelings that might provoke painful recall. Hyperarousal: Symptoms of anxiety or increased arousal not present before the trauma (or exacerbated by the trauma) that may include difficulty falling or staying asleep, hypervigilance (increased general level of awareness and alertness toward the subject's surroundings, in the absence of imminent danger which may be manifested by an exaggerated startle response, jumpiness, scanning the environment for danger). Some individuals report irritability, anger or difficulty concentrating or completing tasks. IF PAINFUL RECALL, AVOIDANCE, AND HYPERAROUSAL SCREEN ALL POSITIVE, NOTE ON THE PTSD SCREEN PAGE (CHECKLIST). NOTE: IF MORE THAN ONE EVENT IS CHECKED ON THE PTSD SCREEN PAGE (CHECKLIST), THE PTSD SECTION WILL BE COMPLETED TWICE: ONCE FOR THE LIFE EVENT GROUP B OR GROUP A THAT THE SUBJECT DESCRIBES AS THE MOST UPSETTING IN THE LAST 3 MONTHS, AND SECONDLY FOR THE LIFE EVENT IN GROUP B THAT THE SUBJECT DESCRIBES AS THE MOST UPSETTING EVENT EVER.

**SEXUAL ABUSE OR RAPE**

Sexual abuse episode(s) in which a person, termed a perpetrator, involves a child or adolescent in activities for the purpose of the perpetrator's own sexual gratification. These activities can include kissing (that makes a person uncomfortable), genital fondling (over or under clothing), oral-genital or oral-anal contact, genital or anal intercourse, or use of instruments. Sexual abuse does not include medical exams or mutually desires sexual relations with a peer.

Rape is a sudden unexpected (usually isolated) event involving non-consensual sexual intercourse.

*Has anyone ever touched you in places where they shouldn't?*

*Has anyone ever touched you in ways that made you feel funny?*

*Or seemed wrong to you?*

*Has anyone ever made you touch them in ways that made you feel uncomfortable?*

What happened?
Who was involved?
How did you feel about it?
Were you upset?
When did it first happen?
How many times has it happened?
Has it happened in the last 3 months?

How about in the last 3 months?

SEEKING HELP (SEXUAL ABUSE)

Three forms of supportive response to requests for help are coded: listening, which could provide social support and emotional relief; personal intervention, which is personally attempting to prevent the reoccurrence of the situation; or intervention involving a professional agency, which might be phoning the police, contacting appropriate services, referring the subject to such services, or removing the subject from what s/he experiences as an unsafe environment. Unsupportive responses include unwillingness to listen, reluctance to get involved, denial of the truth of the story, and threatening the child if anyone else ever told.

RELIVING OF LIFE EVENT

Behaving or feeling as though the "life event" were recurring. The experience may involve a sense of reliving the event, illusory or hallucinatory phenomena, or "flashbacks". Flashbacks involve hallucinatory phenomena of sufficient intensity to impair perception of the real world to a substantial degree.

Include panic attacks where the mental content of the panic episode is related to the "life event".

Include such phenomena even if they occurred at times of intoxication with alcohol or drugs or during sleep cycle.

CODE NIGHTMARES IN ITEMS THAT FOLLOW.

In the last 3 months, have you felt as though the "life event" was happening to you again, even when it wasn’t?

What was that like?
What did you do?
How long did it last?
How often did it happen?
How real did it seem?
Did you feel as though you were really there, and that it was really happening again?
When it was happening were you aware of what was really going on around you and where you really were?
Did the memory of "life event" seem more real than your actual surroundings?
Did this happen when you were falling asleep?
Or waking up?
Do you ever wake up in the middle of the night feeling this way?
