**QUALITY OF INTERVIEW**

Code your subjective impression as to the quality of the information collected during the interview. The subject may have refused to provide adequate descriptions of symptoms or been deliberately misleading on occasion.

0 = Adequate

2 = The interview is inadequate, in relation to the specified area, only in certain parts of the interview. Note the section where data is probably inadequate.

3 = The whole interview is inadequate.

The initial section of the interview is designed to set the subject at ease, to obtain "scene-setting" information, and to allow the subject to express his/her concerns. The interviewer should follow the subject's leads and should avoid premature intrusive cross-questioning.

WHETHER DIFFICULTIES (PARENT'S PERCEPTION)
Now I’d like to get a picture of why it is X is going to the clinic?
Who’s idea was it for X to go to the clinic?

TYPE OF PROBLEM (PARENT’S PERCEPTION)
What was it that you were concerned about?
When did you become concerned about it?
Were there any other concerns?
What made you seek help now?
What sort of problems were you having with X?
What does X think about it?

IF OTHER'S INITIATIVE ASK THE FOLLOWING
Would you have been concerned if s/he hadn’t raised it?
(IF YES) What were you concerned about?
When did you become concerned about it?
Can you tell me why you’re taking X to the clinic?
What does X think about it?
REFERRING AGENT
The referring agent is the individual who made the contact with the clinic that led to the referral being offered. If a medical practitioner wrote to the clinic and the mother then made an appointment, code the medical practitioner as the referring agent. If the mother had gone to the clinic on the verbal advice of the medical practitioner, then the mother would be regarded as being the referring agent.

WHEN YOU HAVE AN OVERALL PICTURE OF THE CHILD’S PROBLEMS, MOVE ON TO SOMATIZATION SECTION.
SOMATIZATION
NOTE THAT THIS SECTION SERVES TO EXCLUDE BRIQUET’S SYNDROME, BUT THAT THE MOST COMMON CAUSE OF MULTIPLE PHYSICAL SYMPTOMS IS PHYSICAL ILLNESS.

How has X felt physically over the last 3 months?
Has s/he had any illness?
How did the illness affect him/her?
Does s/he have anything else physically wrong with him/her?

SUBJECT IS FEMALE
IF SUBJECT IS FEMALE, CODE PRESENT.

FEMALE
0 = Absent
2 = Present

SUBJECT IS MALE
IF SUBJECT IS MALE CODE PRESENT.

MALE
0 = Absent
2 = Present
HEADACHES

Does s/he get any headaches?

How long do the symptoms last?
How often over the last 3 months has s/he had a headache like that?
How ill has s/he been?
When did the "symptoms" start?
What have you done about them?
How much do they affect his/her life?

Has s/he missed any school/work because of them?
Has s/he contacted the doctor?
What did the doctor say is wrong?
When was that?
What did "X" do about it?
What did you do?

Did s/he need any medication?

Do you think these "symptoms" are serious?
Do you sometimes think they're not real but imaginary?

**How has his/her appetite been in the last 3 months?**

**Has it been less than usual?**

**Has the amount s/he eats changed at all?**

Has s/he been eating as much as usual?
Why not?
Has s/he been eating as much as usual?
Has s/he lost any weight?
When did his/her appetite start to fall off?

**Weight Loss**
Has s/he lost an unusual amount of weight during the last 3 months?
Are you happy with his/her weight?
How much?
When did s/he start losing weight?

#### Excessive Appetite
An increase in appetite outside the normal range of the subject, including eating for comfort. Include change in appetite due to substance due or side effects of medication.

**Follow on from screening questions to get details.**

Has s/he had a bigger appetite than usual?

Why?
What about in the last 3 months?

Has s/he actually eaten more than usual?

How much more?
When did s/he start eating more?
WEIGHT GAIN
Do not include normal developmental weight gain, premenstrual weight gain, or weight gain because of pregnancy.

Has s/he put on an unusual amount of weight in the last 3 months?
How much?
How long has s/he been putting on weight?

FOOD FADS
Child will consume only a restricted range of foods not typical of others of his/her developmental stage or social group.

Do not include simple dislike of cabbage etc.

Is s/he choosy about the foods s/he will eat?
Does s/he have food fads?
What sort of things won't s/he eat?
Why is that?
What do you do about it?
Will s/he eat these things if s/he’s pushed?
When did s/he start to get choosy about the food s/he will eat?

*Has s/he been on a diet in the last 3 months?*

*How long did s/he stick to it?*

*Is s/he afraid of getting fat?*

*Does s/he ever have really severe eating binges on his/her own?*

*Does s/he avoid foods that might make him/her fat?*

*Has s/he done any exercise to lose weight?*

*Has s/he done anything else to lose weight?*

*Does s/he think you need to lose weight?*

*Does his/her weight bother him/her at all?*

**Definitions and questions**

**DELIBERATE REDUCTION OF BODY WEIGHT**

Deliberate attempts to reduce body weight by dieting or any other method, for any reason.

A "diet" refers to any attempt to reduce body weight by the deliberate restriction of caloric intake (no matter how feebly adhered to), lasting at least 1 week.

"Exercise" refers to any physical activity undertaken for at least 1 week with the specific intention of reducing body weight. Do not include items such as jogging for general health purposes, unless the subject also states that a supplementary aim is weight reduction.

Do not include diets or exercise regimens prescribed by physician or other medical advisor, or parent.

**Does s/he try to keep his/her weight down?**

**Is s/he on a diet?**

**What sort of diet?**

**Does s/he exercise to lose weight?**

**Does s/he ever make him/herself vomit?**

**Does s/he take any medicines or pills for his/her weight?**

**When did s/he start doing that?**

**What do you think of his/her diet?**

**Does it worry you?**

**Is s/he making him/herself too thin, do you think?**

**What happens if you encourage him/her to eat?**

**When did you first take anything like that for your weight?**

PREOCCUPATION WITH FOOD AND EATING
Unusual and excessive amount of time spent thinking or worrying about food and eating; total daily duration of at least 1 hour.

**How much does s/he think about food and eating?**

**Does s/he take a lot of interest in how fattening foods are?**

**Does s/he worry about food?**

How much?
What does s/he say about it?
Can you stop him/her worrying about it?
Can anybody?
Do you think it is a real problem?
How much time does s/he spend thinking about food or eating?

IF IMPOSSIBLE TO SEPARATE, CODE UNDER WORRYING ABOUT BECOMING FAT.
WORRY ABOUT BECOMING FAT

A round of painful, unpleasant or uncomfortable thoughts about becoming (or being) fat or obese; total daily duration of at least 1 hour.

NB. IF "PREOCCUPATION WITH FOOD AND EATING" AND "WORRY ABOUT BECOMING FAT" DO NOT MEET THE ONE HOUR DAILY CRITERION SEPARATELY, BUT THE TWO SYMPTOMS TOGETHER LAST 1 HOUR OR MORE IN DAILY TOTAL, CODE UNDER PREOCCUPATION WITH FOOD AND EATING AND BASE FREQUENCY, DURATION AND ONSET ON COMBINED SYMPTOMS.

Does his/her weight worry you?

BODY IMAGE DISTURBANCE
Child has unrealistic conviction that s/he is fatter than is the case.

Do not code fat people, who realistically report that they are fat, here.

How does s/he see his/her body size?
Does s/he think s/he is thin or fat?
Does s/he think s/he is fatter than average?
Can you persuade him/her that s/he’s not fat?

**BULIMIA (EATING BINGES)**

Recurrent, discrete, secret, episodes of excessive, rapid eating of easily ingested food. Do not include snack "binges" (for instance on return from workout or sports) where there is no attempt at secrecy, even though there may be no one else around. Do not include public displays of greed, or individuals who normally have large appetites.

Does s/he have eating "binges" or attacks?

What are they like?
What does s/he eat?
Does s/he go off on his/her own to eat?
Does anything trigger them?
Do you try to resist them?

AMENORRHEA
Absence of periods for at least 3 months in a row after onset of regular periods. Onset of regular periods means that subject has had a period three times in a row, no more than 36 days apart.

Have her periods started?
IF PERIODS HAVE STARTED, ASK ABOUT AMENORRHEA.

Have they stopped again?
When did they stop?

SELF EVALUATION DEPENDS ON SHAPE AND WEIGHT
The subject's evaluation of him/herself is reported to be strongly dependent on his/her shape or weight. Thus s/he regards his/her value as a person, evaluation by peers or others as being heavily influenced by his/her shape or weight. Do not include being underweight or underdeveloped.

Does his/her weight make a difference to how s/he feel about him/herself?
How important is his/her weight or shape in affecting how s/he feel about him/herself?
Is it the most important factor in the way s/he thinks about him/herself?
Does s/he think it affects how other people see him/her and what they think of him/her?
Would s/he feel better about him/herself if s/he were thinner?
Would it make a really big difference?
When did s/he start to feel like that about his/her weight or shape?

SLEEP PROBLEMS
Now I want to talk with you about X's sleep. I want to understand what usually happens when you put X to bed, what happens during the night, and what it is like waking him/her up in the morning. Tell me about what kind of sleeper X is. Has s/he always been like that?

SLEEP PROBLEMS

INSOMNIA
Disturbance of usual sleep pattern involving a reduction in actual sleep time of at least 1 hour during the subject's sleep period that is accompanied by a subjective feeling of a need for more sleep. Do NOT include externally imposed changes in overall sleep pattern (e.g., change in job hours, arrival of new baby), or insomnia during first 2 weeks following such changes. Sleep problems are scored irrespective of taking medication for them, but note whether medication is being taken. Also include changes attributed to side effects of medication or substance use.

How has his/her sleep been in the last 3 months?

What time does s/he go to bed?

Is it hard for him/her to fall asleep when s/he wants to?

How long does it take?

Is that every night? How often?

Is there any reason for it (e.g. fear of the dark)?

Once s/he's off to sleep, does s/he wake up again in the night?

Why is that?

Can s/he get back to sleep again easily?

Does s/he wake up early in the morning and can't go back to sleep?

Is that earlier than s/he needs to?

What happens when s/he wakes up?

What does s/he do?

Does s/he need more sleep?

How long has s/he been having sleep problems?

### Definitions and questions

**HYPERSOMNIA - INCREASED NEED FOR SLEEP**
Total hours sleep exceed usual amount by at least one hour, unless subject prevented from sleeping.

**Does s/he feel sleepy during the day?**
More sleepy than usual?
More than most other kids?
**Does s/he drop off to sleep in the day?**
For how long?
How long has s/he been more sleepy than usual?

**RESTLESS SLEEP**
Sleep is described as restless. Restless sleep may occur with insomnia, with hypersomnia or with neither of these.

**How would you describe an average night’s sleep for him/her?**
Does s/he sleep soundly?
Does s/he toss and turn?
Is s/he restless?

**INADEQUATELY RESTED BY SLEEP**
Sleep disturbance does not meet criteria for insomnia, but subject describes being inadequately rested by sleep upon waking.

**Does s/he usually get a good night’s sleep?**
Is s/he fairly well rested when s/he gets up?
Or after sleeping during the day?
How does s/he feel?
When did that start?

### Definitions and questions

#### NIGHTMARES
Frightening dreams that waken the child with a markedly unpleasant affect on waking (which may be followed rapidly by feelings of relief).

IF NIGHTMARES ARE ASSOCIATED WITH SEPARATION ANXIETY, CODE THEM MORE SPECIFICALLY AS SEPARATION DREAMS.

IF NIGHTMARES ARE ASSOCIATED WITH TRAUMATIC EVENTS, AND MEET CRITERIA FOR CODINGS, CODE THEM HERE AND THERE ALSO.

_In the last 3 months has s/he had any bad dreams or nightmares that have woken him/her up?_

What are they about?
What are they like?
How often?
When did the nightmares start?

#### TIREDNESS
A feeling of being tired or weary at least half the time.

_Has s/he been feeling especially tired or weary?_

How much of the time has s/he felt tired like that?

#### FATIGABILITY
Child becomes tired or "worn out" more easily than usual.

_Has s/he become tired or "worn out" more easily than usual?

Does s/he feel exhausted even by things that would have been no problem before?

When s/he gets tired like that, does it take a long time to get over it?
Is that more than usual for him/her?
How long has s/he felt that way?

FAMILY SECTION
FAMILY STRUCTURE AND FUNCTION

This section has five major functions;

(1) ESTABLISHING RAPPORT BETWEEN THE INTERVIEWER AND THE INTERVIEWEE. The better the rapport between the interviewer and the interviewee, the better the material collected by the interview is likely to be. Good rapport also makes the interview much more pleasant for both parties and improves the flow of information. The interviewer should appear friendly, alert, and interested, but without being too obviously intrusive. The interviewee should be allowed to talk, and not over-energetically harried with questions. As far as possible the child's interests and activities should be positively connoted, and a non-censorious attitude to his/her limitations and attitudes should be adopted. Attention should be paid to the maintenance of rapport throughout the interview, but the early stages are especially important in setting the tone for the rest of the session.

(2) ESTABLISHING THE STYLE OF THE INTERVIEW. At the start of the interview, the interviewee does not know what to expect of it, or what sort of information s/he is being asked to provide. The early stages of the interview are therefore important in providing an opportunity for the interviewee to learn what is required.

(3) COLLECTING INFORMATION ABOUT FAMILY STRUCTURE, LIFE AND RELATIONSHIPS. This section represents an extension of the original family life and relationship section for use when more detailed information is required. A number of ratings are made of dimensions of family function and dysfunction that have been found to be related to child psychopathology in many studies. Many of these items are modified versions of material contained in the Child Life Events and Long-term Environment Adversity (CLELEA) interview, developed at the Institute of Psychiatry by Seija Sandberg and Micheal Rutter.

(4) FINDING ENTERIES TO OTHER SECTIONS OF THE INTERVIEW. This section is likely to throw up indications of areas of pathology, which may then be followed up.
(5) COLLECTING INFORMATION RELEVANT TO THE INCAPACITY RATINGS. Many of the questions in these sections are directly relevant to the ratings of Incapacity. It is important, right from the start of the interview, that the interviewer should be thinking about disturbance at the level both of symptoms and incapacity.

ORGANIZATION OF THE SECTION

The section is organized into 4 sub-areas:

(1) Family structure
(2) Family life and relationships
(3) Relationships with parents
(4) Relationships with siblings
FAMILY STRUCTURE

SIBLINGS

In this context, "siblings" include all children (or adults 18 or older) of the parents or parent substitutes who are responsible for the child, whether they are related by blood or not, and are listed in order of age (oldest first). Therefore, half-siblings and other children by previous marriages who may not be biologically related to the index child are included, as are "adoptive siblings" (which can mean that either the sibling or the child is adopted). This item includes siblings who either live or do not live at home with the index child. At this stage in the interview, the focus is on forming a picture of the current home environment of the child, with some understanding of the complications of the wider family group.

For each sibling, note name, relationship to child, sex, age, and whether the sibling has been in the home for one month of the primary period.

Newborns need not have lived in the home one month to be recorded as living in the home.

For siblings less than 1 year old, mark 0 for age.

A half sibling is one who shares one common parent with the child. For example, a mother who remarries and has another child with her new husband; the half-siblings would both have the same mother.

A step sibling is related to the child by marriage only, and shares no biological parent with the child.

MULTIPLE BIRTH

Note whether the target child is the product of a multiple birth. Code whether the parent believes the child to be an identical or non identical twin (or triplet, etc.). The child’s position in that birth is then coded. A first born twin is coded as 1, even if s/he has older siblings.
Make a note of the evidence for identical/non identical status.

Code the details of the birth order here only if the child is the result of a multiple birth.

OTHERS IN THE HOUSE

Note here the name and status of any adult (other than adult siblings) who has lived in the house for at least 1 month during the previous three months.

Some families have very complicated patterns of relationships, and some children may have lived in various places during the three month primary period. The basis for these codings should be the site where the child has lived for the greatest proportion of the primary period, provided that there was at least one parental figure (that is, one who assumed some responsibility for attempting to control the behavior and discipline of the child) in the household during that time.

If the child has not lived at home for at least 1 month during the primary period, complete the Family Section on the last one-month period that s/he did live at home. If two different family placements of at least one month’s duration have occurred during the primary period, the codings are made for the longest lasting of these. If there have been two placements of equal duration, the more recent is the basis for coding.

If there are more than ten others in the house, omit those who are the least closely related to the child. If further discrimination is required, omit those who have been there for the least time.

AGE AT ADOPTION

Enter the age (in years and months) at which the child was adopted by the current family, or the age at which a child is legally adopted by a step-parent.

FOSTER CARE
If child has ever been in foster care, code the number of foster homes and the earliest date of placement.

If child is currently in foster care, code the date of placement in that home.

**BIOLOGICAL PARENTS’ MARITAL STATUS**

This item refers to the biological parents’ latest marital status. Thus, if a couple lived together for a year, were then married for 5 years before being divorced, they would be coded 4 (Divorced).

If biological parents have a common law marriage (i.e. have cohabited for a period that the state determines is common law marriage) then code marital status as cohabited > 6 months.

Biological parents who prefer to live apart or are legally separated are coded as separated.

Note that this item refers only to the biological parents, and so does not necessarily refer to those who now “parent” the child.

**NUMBER OF YEARS BIOLOGICAL PARENTS LIVED TOGETHER**

The number of years that the biological parents lived together, regardless of marital status. Include the years that the child’s biological parents lived together unwed, or the time biological parents lived together before getting married.

**PARENTAL FIGURES**

The term Parent refers to any adult who has lived in the child’s home for at least 1 month, who assumes some responsibility for attempting to control the behavior and discipline of the child. Thus, a parent’s live-in partner is regarded as a parent if s/he is involved in any way in providing discipline or care for the child.
For the entire Family Functioning Section, Parent #1 and Parent #2 refer to parental figures in the home who have lived with the child for at least 1 month in the 3 months being used in the family section. These are coded here as parental figures in the home.

Other Parent #1 and Other Parent #2 refer to parents who no longer live in the home. These may include biological parents, adoptive parents, step parents, or other “parents” who have had an impact on the child’s upbringing. These are coded here as parental figures living elsewhere.

This section clarifies who are coded throughout the interview as Parent #1, Parent #2, Other Parent #1, and Other Parent #2. #1 and #2 are used in order to allow coding of atypical combinations of parents (two of the same sex as in having had two previous step-fathers, gay or lesbian parental relationships, or people who are not married as in mother and grandfather).

For the entire Family Functioning Section the mother and father refer to parental figures in the home, except as noted below. Information on who lives in the family home is coded separately under Others in Family Home. The relationship between the "parents" in the home is coded separately under Parental Relationships. The Marital Status of the Biological Parents is coded separately as well.

Examples of Codings of Parental Figures:

CHILD IN HOME WITH BOTH BIOLOGICAL PARENTS

If the child lives with both biological parents, code them throughout the section as Parent #1 and Parent #2.

If the biological parents have separated or divorced within the primary period and the parent now living elsewhere was in the family home for at least 1 month, code the biological parents as Parent #1 and Parent #2.
CHILD IN HOME WITH ONE BIOLOGICAL PARENT: If the child lives with one biological parent and a new partner who serves as a parent, and the other biological parent lives elsewhere, code the parent and the new partner as Parent #1 and Parent #2 respectively. Code the other biological parent living elsewhere as Other Parent #1.

If the child lives with one biological parent who does not have a new partner who serves as parent, code that parent at Parent #1, and the absent biological parent as Other Parent #1. As the child may have had very little contact with the biological parent living elsewhere, some of the questions may not be applicable and should be coded 'structurally missing'.

If the biological parents are separated or divorced and share custody of the child exactly 50/50. The mother counts as Parent #1 and her home is the home used for the section. If the mother is unavailable to interview, and the father is available, the father is coded as Parent #1 with his home being used for the home section, and the mother becomes other Parent #1.

CHILD IN HOME WITH NO BIOLOGICAL PARENT: If the child lives with adoptive/foster/step parents, both of whom are involved in parenting the child, code them as Parent #1 and Parent #2. If the child has any knowledge of or contact with the biological parents, code them as Other Parent #1 and Other Parent #2.

If only one adoptive/foster/step parent is in the home, with no current partner who parents, code him/her as Parent #1. Code the absent biological parents as Other Parents #1 and #2. If Parent #1’s previous partner (who is not biological parent) served as a parent and is still involved in the child’s life, you may choose to code him/her as an Other Parent, instead of a biological parent with whom the child has no contact.

If the child lives with another adult (e.g., grandmother, aunt, non-related person) who has a partner who serves as a parent, code them as Parent #1 and Parent #2. Code the absent biological parents as Other Parents #1 and #2.
If the child lives with another adult (e.g. grandmother, aunt, non-related person) who has no partner, code that adult as Parent #1. Code the absent biological parents as Other Parent #1 and #2.

Code aunts/grandparent/adult siblings as parents ONLY if they are acting as parent, instead of the mother or father. For instance, if the child lives with his/her biological mother and grandmother, but the latter does not act as a parent, as defined above, the grandmother would not count as Parent #2.

CHILD WITH DECEASED PARENT(S): If the child's parent(s) died during the primary period, code the parent as deceased. However, because the parent(s) was alive for at least part of the primary period, code information relevant to the child's relationship with that parent wherever possible throughout the Family Section.

If the child's parent(s) died prior to the primary period, code as deceased and complete the following items on the deceased parent: ethnic origin/race of biological parent, parental psychological problems, parental substance abuse problems, and parental arrests and prosecutions. For the age of deceased parents, code the age at time of death.
ETHNIC ORIGIN/RACE

This refers to the ethnic origin of each biological parent and the child. These categories have been established by the Federal Government for all Federal Grants.

AI= American Indian or Alaskan Native. A person having origins in any of the original peoples of North America, and who maintains a cultural identification through tribal affiliation or community recognition.

AS= Asian or Pacific Islander. A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area included China, India, Japan, Korea, the Philippine Island and Samoa.

BL= African-American/Black African. A person having origins in any of the black racial groups of Africa.

HI= Hispanic. A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

WH= White (European or Middle Eastern). A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

OT= Other. A person of a previously unspecified origin or a person insisting of a cultural identification of mixed origins.

### MARITAL RELATIONSHIP

A Marital Relationship is either a legal marriage or any continuing relationship that has lasted at least six months. In both cases, the relationship must have been ongoing during the last 3 months, with the partners living together in the same home for at least one month of that period.

N.B. Include homosexual partnerships if they fulfill the above criteria.

In the absence of a Marital Relationship, complete the ratings for an Exclusive Partnership, if appropriate.

RELATIONSHIP BETWEEN PARENT 1 AND OTHER(S)

EXCLUSIVE PARTNERSHIP
Any exclusive relationship that has been ongoing for at least 3 months and has continued for some period during the preceding 3 months; and that has involved the partner in visiting the child's home for at least 10 hours per week.

DATING
A relationship that fulfills the criteria for an Exclusive Partnership, except that it does not meet the 10 hr. time criterion.

LIVING AT HOME - FAMILY LIFE AND RELATIONSHIPS

RELATIONSHIPS WITH AND BETWEEN PARENTS

There are two basic dimensions of relationships with parents: a qualitative aspect, that is the quality of the relationship during that time; and a quantitative aspect, that is, time actually spent involved with parents.

ACTIVITIES WITH PARENT #1
Activities with parental involvement are coded here.

What sort of things do you do with X?
Do you go out together?
What about shopping?
Do you help with homework?
Or with his/her hobbies?
Do you go fishing/hunting etc. with X?
Do you have meals together?
Or watch T.V. together?
Do you all go out together as a family?
Do you drive X to outside activities?

Do you enjoy doing things with X?

Does X enjoy doing things with you?

Is that all the time or...
Why not?
What happens?
Can you tell me about the last time something like that happened?

ACTIVITIES WITH PARENT #2
Activities with parental involvement are coded here.

What about your partner?
Does X enjoy doing things with him/her?

ACTIVITIES WITH PARENT

0 = All or most (at least 75%) shared activities said to be a source of enjoyment to child
2 = At least some (25-74%) shared activities are a source of tension, worry, or disinterest to the child.
3 = All or most (at least 75%) shared activities are a source of tension, worry, or disinterest to the child.

ACTIVITIES WITH PARENT

0 = All or most (at least 75%) shared activities said to be a source of enjoyment to child
2 = At least some (25-74%) shared activities are a source of tension, worry, or disinterest to the child.
3 = All or most (at least 75%) shared activities are a source of tension, worry, or disinterest to the child.
INADEQUATE SUPERVISION BY PARENT #1

Parent fails to provide sufficient supervision, as shown by frequent lack of knowledge of the child's whereabouts, activities, or company; and/or fails to maintain effective control/ or disciplinary strategies; and/or is not concerned, or does not attempt to intervene, when the child's behavior is deviant, or likely to lead him/her into trouble.

If parents have given up trying to maintain discipline, Code as 3.

Does X do any chores?

What does s/he do?
Does s/he do a good job?
Does s/he help around the "house" in any other way?
Is it easy for you to get him/her to do what you want?

What happens when X doesn't want to do what you say?

Have there been times in the last three months when s/he didn't do what was asked?

What do you do about it?
Does it bother you?
Does it lead to arguments?
Do you ever just give up?
What happens then?
How often had that happened in the last three months?
Do you always know where X is when s/he is not at home?

Do you expect X to let you know where s/he is?

Over the last three months, how often has s/he been out without your knowing where s/he is?

INADEQUATE SUPERVISION BY PARENT #2

Parent fails to provide sufficient supervision, as shown by frequent lack of knowledge of the child's whereabouts, activities, or company; and/or fails to maintain effective control/ or disciplinary strategies; and/or is not concerned, or does not attempt to intervene, when the child's behavior is deviant, or likely to lead him/her into trouble.

If parents have given up trying to maintain discipline, Code as 3.

What about with parent #2?
Definitions and questions

OVERINVOLVEMENT BY PARENT #1
Parent is unusually intrusive into, and controlling of, the child's life, to a degree that involves infantilization of the child. For instance, by excessive checking of the child's activities, preventing age-appropriate independent behavior or decision-making (such as selecting friends or clothes).

Does X think you give him/her enough independence?

Does s/he still need help choosing clothes?

Does s/he want you to help?

What about washing his/her hair?

Can you trust him/her to get clean at bath time?

Do you let him/her go out alone?

Can s/he ride his/her bicycle or walk to places s/he wants to go?

Do you need to exercise control over who X's friends are?

How much do you like X to make decisions on his/her own?

Do you ever need to go through X's belongings?

Or look in his/her closets?

Are there things s/he would like to be able to do that you won't let him/her do?

OVERINVOLVEMENT BY PARENT #2
Parent is unusually intrusive into, and controlling of, the child's life, to a degree that involves infantilization of the child. For instance, by excessive checking of the child's activities, preventing age-appropriate independent behavior or decision-making (such as selecting friends or clothes).

What about your “partner”?

Coding rules

OVERINVOLVEMENT BY PARENT

0 = Appropriate level of involvement for the child's age and situation

2 = Definite infantilization (e.g. dressing of washing child above age where this is normal); and prevention of age-appropriate behavior or decision-making

3 = As 2, but reaching extreme proportions

HARSH DISCIPLINE BY PARENT #1
One or both parents uses a harsh, restrictive or physical disciplinary style, leading to punishments that are more severe than would usually be thought appropriate.

What do you do to discipline X?

Do you have to punish him/her often?
Tell me about the last time you had to punish him/her.
Was that fairly typical of what happens?
How often does X get grounded for doing something wrong?

What other sorts of punishment does s/he get?

Do you ever hit X?

How often?
What happens then?
How often does X need to be punished altogether?

HARSH DISCIPLINE BY PARENT #2
One or both parents uses a harsh, restrictive or physical disciplinary style, leading to punishments that are more severe than would usually be thought appropriate.

What about your "partner"?

SELECTIVE NEGATIVE VIEW BY PARENT #1

The target child is regarded more negatively by his/her parents than the other child(ren) in the home. Just because one child has more problems, it doesn't mean that s/he will be the subject of a selective negative view. To be rated here, the child must actually receive different treatment from the other child(ren) for equivalent misdemeanors.

## RELATIONSHIPS WITH SIBLINGS

Determine the quality of the child's relationship with each sibling, regardless of place of residence.

Check that siblings are coded in the same order.

Code as structurally missing if child has or knows of relations, such as half siblings, but there has been basically no contact. Do not use "structurally missing" to indicate that there was a relationship, but they no longer see each other because of a negative relationship.

Child has siblings.

### How does X get along with his/her "brothers and sisters"?

Is s/he especially close to any of them?

Who is that? (Note Age and Sex).
Do they do things together?
Can s/he share secrets or talk about his/her problems/worries with "sibling"?
Is the time they spend together more likely to be harmonious (good times) or conflictual?

Are there any of his/her brothers/sisters that s/he doesn't get along with?

Do any of his/her brothers/sisters pick on X in particular?

Or are there any of his/her brothers/sisters that X avoids because they don't get along?

Who is that?
Do they argue a lot?
Or get into physical fights - I mean real fights?
How long do they stay angry at each other afterwards?
When did they start not getting along?
When did they start to get along badly?
What about the others?

Definitions and questions

DISSATISFACTION WITH PARTNER'S HELP - PARENT #1

The interviewee expresses dissatisfaction with the distribution of chores, childcare, shopping, or other home-making activities.

*How do you share chores and jobs around the house with your "partner"?*

Like shopping?
Or looking after the children?
How about preparing meals?
And cleaning?

*Are you satisfied with the way you share these things in the home?*

*Are there any things that you would like shared differently?*

Does this ever lead to bad feelings between you?
Do you argue about it?
What happens then?
Does "partner" take any notice of what you feel about it?

DISSATISFACTION WITH PARTNER'S HELP - PARENT #2

*Is your "partner" satisfied with the way things are shared in the home?*

*Are there any things that s/he would like shared differently?*

Does that cause trouble between you?

Coding rules

DISSATISFACTION BY PARENT #1 WITH PARTNER'S HELP

0 = Satisfied with partner's help.
2 = Dissatisfied with some aspects of partner's help to an extent sufficient to cause at least occasional anger, or arguments.
3 = Almost complete dissatisfaction with partner's contribution to home-making. Almost no positive help perceived as being provided by partner.

DISSATISFACTION BY PARENT #2 WITH PARTNER'S HELP

0 = Satisfied with partner's help.
2 = Dissatisfied with some aspects of partner's help to an extent sufficient to cause at least occasional anger, or arguments.
3 = Almost complete dissatisfaction with partner's contribution to home-making. Almost no positive help perceived as being provided by partner.
DISSATISFACTION WITH COMMUNICATION AND DECISION-MAKING BY PARENT #1

Parent expresses dissatisfaction with the quantity or quality of communication with his/her partner; and/or dissatisfaction with the way that they arrive at decisions that affect them as a couple, or affect the family.

How much do you talk with "partner" about ordinary, everyday things?

Like what's in the news?
Or what's been happening to you during the day?
Or what (the children) have been doing?
Do you talk over problems or difficulties with each other?

Like worries over the children?
Or problems with relatives?
Do you talk about any problems?
Can you say what you feel about those sorts of things?

Or do you keep what you think to yourself?
Why is that?
Are there any problems you'd like to talk to "partner" about, but you can't?

What problems are they?
Why can't you talk about them?
Who usually decides things in the home?

Like making big purchases?
Or how the children should be disciplined?
Or when you both go out?
Are you happy with its being that way?

Have you tried to do anything about it?
What happened?
Does it cause disagreements?

DISSATISFACTION WITH COMMUNICATION AND DECISION-MAKING BY PARENT #2

Parent expresses dissatisfaction with the quantity or quality of communication with his/her partner; and/or dissatisfaction with the way that they arrive at decisions that affect them as a couple, or affect the family.

What does your "partner" think about it?

Can s/he say what s/he feels about any problem?
Or does s/he keep what s/he thinks to him/herself?
Does it cause disagreements?
Definitions and questions

PARENTAL ARGUMENTS
Arguments are disagreements between parents in the home, lasting at least 5 minutes, that result in a dispute involving raised voices, shouting, verbal abuse, physical aggression, or fights. Only one parent need to be involved in shouting, etc.

Nearly all couples argue sometimes. How often do you argue with your "partner"?

What are the arguments like?
Can you tell me about the last time?
How long do they last?
How often do they happen?

INTER-PARENTAL PHYSICAL VIOLENCE (PARENTAL ARGUMENTS)

IN VolVEMENT OF CHILD IN ARGUMENTS OR VIOLENCE (PARENTAL ARGUMENTS)

The child is involved in arguments, whether directly taking part, or used by one or both parents as an ally in the argument. For instance a parent may attempt to persuade, or demand, that the child join in condemnation of his/her partner.

Does X get involved in these "arguments" or "fights" at all?
In what way?
Does either of you try to get X on your side?
What do you do?
What happens then?
Does X get upset when you "argue" or "fight"?
What happens then?
Do you do anything to keep X out of your arguments?
What do you do?

APATHY

A summary rating based on the information collected so far. Apathy is present when the relationship between Parent #1 and Parent #2 is generally characterized by indifference or dislike that does not lead to arguments but to withdrawal from and lack of interest in the partner.

INVOLVEMENT OF CHILD IN ARGUMENTS/VIOLENCE

0 = Child is not involved in arguments.
2 = Child is upset by arguments/violence at least sometimes, as manifested by protesting about them to parents, or becoming withdrawn.
3 = Child is actively involved in argument/violence by one or both parents.

APATHY

0 = Apathy absent.
2 = Marital relationship generally characterized by indifference or dislike, but with some one-sided affection or cooperation over mutual activities.
3 = Marital relationship typified by absence of affection, apathy, indifference, dislike, and avoidance; with negligible cooperation in mutual activities.
PARENTAL RELATIONSHIP(S) WITH PARENTS OUTSIDE THE HOME

RELATIONSHIP BETWEEN OTHER PARENT #1 AND ONE OF CHILD’S CURRENT PARENTS

The relationship between one of the child’s current parents (either Parent #1 or #2) and Other Parent #1.

Do you/does "your partner" have any contact with "Other Parent #1"?

How do you/they get on?

How much contact has there been in the last 3 months?

ARGUMENTS BETWEEN PARENT AND OTHER PARENT

OUT OF SCHOOL ACTIVITIES AND PEER RELATIONSHIPS
SAFETY OF NEIGHBORHOOD
Do X feel safe around where s/he lives?
What is it like?

NUMBER OF ARGUMENTS WITH OTHER ADULTS
An argument is defined as a disagreement, lasting at least 5 minutes, that results in a dispute involving raised voices, shouting, verbal abuse, or physical aggression or fights.

Does s/he have arguments with other adults who s/he sees outside of school?
Who does s/he argue with?
Tell me about the last time.
How long do these argument last?

IF ARGUMENTS WITH ADULTS PRESENT, CONTINUE. OTHERWISE, SKIP TO "AGE APPROPRIATENESS OF FRIENDS", (PAGE 2).
ARGUMENTS WITH PHYSICAL VIOLENCE BY CHILD
An argument is defined as a disagreement, lasting at least 5 minutes, that results in a dispute involving raised voices, shouting, verbal abuse, or physical aggression or fights.

How many arguments has s/he had with other adults over the last three months?
Did the arguments ever get physical?
What happened?

OTHER PHYSICAL VIOLENCE BY CHILD
Has s/he "hit" an "other adult" over the last three months?

AGE APPROPRIATENESS OF FRIENDS
The degree to which the child's friends are within two years of his/her own age. Friends, in this context, refer to those with whom the child spends leisure time, and who are not family members.

Are most of X's friends about X's age?
Are they mostly younger than X?
Or older?
FREQUENCY OF CONTACT WITH PEERS
The frequency with which the child meets with others, who are not family members, during his/her leisure time. Peers can be child's friends, acquaintances, or peers in neighborhood.

Now I want to ask a few questions about X's friendships with other children.

How often does X play with other children s/he knows, outside of daycare/school?

Does s/he have "play dates" with any friends
Or play with children in his/her neighborhood?

BEST FRIEND
An intensive, selective, and exclusive or semi-exclusive friendship with another person, in which there is an expectation that the dyad does things together, and in which there is a preferential sharing of confidences. There may be 1 or 2 "best friends" at any one time, but if the friendship involves 3 or more peers this would not ordinarily be included as a "best friend" relationship.

Do you have a best friend? (NOTE NAME)

Does s/he ever come to your house?
Or do you go to his/hers?
How long has s/he been X best friend?
What about X's other friends?
Is that different from X's other friendships?
Does "X" tell "best friend" things s/he wouldn't tell other people?

IF NO "BEST FRIEND" CURRENTLY, ASK:

Has s/he had a best friend in the past?

CONFIDANT(E) AMONG PEERS
The presence of a confidante is demonstrated by a personal sharing of intimate feelings with one or more other people in a fashion that is selective to that relationship. The sharing may consist of hopes, worries, personal "secrets," ambitions, problems, fantasies, feelings of love or rejection, etc., but the sharing must be private to the relationship and it must involve some self-disclosure.

Do not include sibling relationships here.

Does X talk with anyone about his/her feelings?
**CONFIDANT(E) IN FAMILY**

*Has s/he talked to you about worries or problems?*

Or anyone else in the family?
Who is that?
Does s/he share "secrets" with anyone?
Does s/he have a friend s/he has talked to about worries or problems?

**OTHER ADULT CONFIDANT(E)**

*Does X share her thoughts or personal problems with adults outside of the family?*
**DIFFICULTY MAKING OR KEEPING FRIENDS**

Child has difficulty either forming or maintaining friendships, which is evidenced by having no or few friends. The difficulty may be due to failure to approach other children (withdrawal) or aggressive relationships with other children (discord) or both.

Do not include worry or anxiety about friendships unless it leads to difficulty in making or keeping friendships.

**Does X have any difficulty making friends with other children?**

**Does s/he have any trouble keeping friends?**

**Does s/he find other children don't want to play with him/her or don't choose him/her for games?**

Does s/he often say that other children do not like him/her? What happens?

Do you think s/he's more shy than other boys/girls the same age?

Does that affect his/her making/keeping friends? Or does s/he get into arguments or fights with friends or other children who might become friends?

How does she feel about that?

Does it bother him/her?

How long has s/he had difficulty making/keeping friends? Has it always been like that, or can you remember when it started?

How long do these arguments last?
How many arguments has s/he had with other kids away from school over the last three months?

**CONFLICTUAL RELATIONSHIP WITH FRIENDS**
The child has relationships with a friend or friends that include substantial amounts of physical or verbal aggression or arguments. Conflict may or may not cause the child problems in making or keeping friends.

THIS ITEM IS GENERALLY CODABLE BASED ON INFORMATION ALREADY GIVEN.

YOU HAVE TOLD ME THAT X DOESN'T HAVE DIFFICULTY MAKING OR KEEPING FRIENDS.

*Does X have a lot of conflict with his/her friends?*

Does it cause him/her difficulty in making or keeping friends?

**SHYNESS WITH PEERS**
Sensitive reluctance to approach peers who are little known to the subject.

CONSIDER SOCIAL ANXIETY ESPECIALLY IF SHYNESS IS PRESENT TO THE EXTENT THAT CONTACT IS ACTIVELY AVOIDED.

*Do you think that X is more shy than other kids?*

Definitions and questions

**SUBJECT IS TEASED/BULLIED**
Child is a particular object of mockery, physical attacks or threats by peers or siblings.

*Does X get teased or bullied at all by his/her siblings or friends?*

*Is that more than other children?*
*Does s/he feel somewhat singled out?*
*Are other boys and girls mean to him/her?*

---

**"SCHIZOID" LACK OF INTEREST IN PEOPLE**
Child has pervasive lack of interest in peers that is not a consequence of anxiety; does not seek increased contact with them; and lacks a sense of closeness or involvement with other people.

*Does s/he prefer doing things alone or with other people?*

*Why is that?*
*Does s/he enjoy being with people?*
*How well does s/he fit in with other kids?*

*Is s/he usually one of the group?*

**NUMBER OF CHILDREN; CODE ACTUAL NUMBER OF LIVING CHILDREN**
INDISCRIMINATE ADULT RELATIONSHIPS

The child is reported to be willing to be friendly towards almost any adult, to a degree unusual for his/her developmental age, social group, and familiarity with the adult. The child demonstrates reduced or absent reticence around unfamiliar adults. Behavior is inappropriate for contact with unfamiliar adults.

Often the child appears "needy" or "clingy," and behaves inappropriately with unfamiliar adults. This item should only be coded as being present when the child's behavior is clearly outside normal limits. If in doubt, code this item as being absent. A child who is simply friendly or polite to adults would not code here.

Does X seem desperate for affection from adults?

Is s/he overly friendly with strangers?

Does s/he seem to be really needy or clingy to whatever adult is around?

Does s/he seem to need affection from whatever adult is near?

Is X sensible about being friendly with adults?

Is that more than average for a child his/her age, do you think?

Does it worry you?

Do you think it's a problem?

Has s/he always been like that?
INDISCRIMINATE PEER RELATIONSHIPS

The child is reported to be willing to be friendly towards almost any peer, to a degree unusual for his/her developmental age, social group, and familiarity with the peer in question. Behavior is inappropriate for contact with unfamiliar peers.

For example, the child might call another child his/her best friend or ask another child to give him/her the child's toy right after meeting him/her. Or hug, kiss, or touch another child who is unfamiliar to the child.

Does X seem desperate for affection from other children?

Is s/he overly friendly with children s/he doesn’t know well?

Does s/he seem to be really needy or clingy?

Does s/he seem to need a lot of affection from other children?

Does it worry you?
Do you think it's a problem?
When did s/he start acting this way?

SCHOOL INFORMATION FOR THOSE WHO HAVE LEFT SCHOOL

School Information for Those Who Have Left School Officially

Information about the school history of students who left school before the 3 month period. Do not include students who are on summer break.

Those 16 or over can officially leave school if either:

1) youth or parent informs the school by letter, by telephone, or by official drop out form, or

2) youth has dropped out: parents or teachers no longer expect him/her to be in school and subject does not go to school at all. S/he may have a 40 hour a week job.

Graduating is not the same as officially leaving school and is coded separately.

If the student dropped out and then has re-enrolled and/or graduated, to not code as having officially left school.

Suspensions and expulsions are not included here but in the Incapacities section.

Code date left school. If the subject has left more than once, code the most recent occasion.

When did s/he leave school?

What was the last grade s/he completed?

Had s/he ever repeated a grade?

Did s/he graduate before leaving?

IF NOT GRADUATE, ASK

**SEPARATION ANXIETY**

**SEPARATION WORRIES/ANXIETY**

Excessive worries or fear concerning separation from the persons to whom the affected child is attached.

There are 2 forms of Separations Worries/Anxiety:

Worries/Anxiety about Possible Harm, and Worries/Anxiety about calamitous Separation.

Worries/Anxiety About Possible Harm:

Unrealistic and persistent worry or fear about possible harm befalling major attachment figures, or fear that they will leave and will not return.

Worries/Anxiety About Calamitous Separation:

Unrealistic and persistent worry or fear that an unexpected calamitous event will separate the child from a major attachment figure, e.g., the child will be lost, kidnapped, killed, or be the victim of an accident.

Tell me how X reacts when s/he is separated from you or other household members.

Does s/he seem afraid of being away from you?

Does s/he worry when you are away?

Or when s/he has to leave you?

When s/he’s away from you, does s/he worry that you might come to some harm?

Or that you might leave him/her?

What does s/he say?

What do you do about it?

Can you stop him/her worrying?

What do you do?

Does s/he worry that s/he might come to some harm while s/he’s away from the family?

WITHDRAWAL WHEN ATTACHMENT FIGURE ABSENT
Social withdrawal, apathy, sadness, or difficulty concentrating on work or play when not with a major attachment figure.

Do you know what happens when s/he's left alone (or with a sitter)?
How does s/he feel?
Can s/he concentrate?
Does anything make him/her feel better?
What is s/he’s with friends?

ACTUAL DISTRESS WHEN ATTACHMENT FIGURE ABSENT
Signs or complaints of excessive distress, or extreme homesickness, when separated from major attachment figure.

Does s/he get very upset sometimes when you’re not with him/her?
Does s/he get homesick?
What's that like?
What does s/he do?

WORRIES
GET EXAMPLES OF BEHAVIOR AND CONSIDER CODING FOR INCAPACITY. WORRIES

A round of painful, unpleasant, or uncomfortable thoughts that cannot be stopped voluntarily and that occurs across more than one activity, with a total daily duration of at least 1 hour.

Do not include worries coded under School Non-Attendance, Separation Anxiety, or Hypochondriasis.

Most people have got some worries. What does X worry about?

Does s/he ever have things on his/her mind that bother him/her?

Does s/he worry about what will happen in the future?

Does s/he worry about bad things happening in the future?

Does s/he worry about things s/he has done?

Does s/he worry about how well s/he does things?

Like school work?
Or how good s/he is at sports?

Does s/he worry about what people think of her?

Does s/he get worried when other people are around?

Or worry about how s/he is with other people?

Does s/he get self-conscious?

Does s/he worry about how s/he looks?

Does s/he worry about whether your family will have enough money?

Worries
Does s/he have other worries?

What are they?
What is it like when s/he worries?
Can you give me an example?
Can s/he turn his/her mind to other things?
Does worrying affect his/her concentration?
Does worrying keep him/her awake at night?
When s/he worries like that, how long does it last?
How often does s/he worry like that in a day?
How often has s/he worried like that in the last 3 months?
Does s/he stop worrying if s/he wants to?
Were there any times in the last 3 months s/he couldn’t stop worrying?
What is s/he doing when s/he is worrying like that?
Does it make any difference what s/he is doing?
What about if s/he is doing other things like TV or school work?
When did s/he start worrying like that?

TOTAL DAILY DURATION OF AT LEAST 1 HOUR

WORRIES ABOUT PHYSICAL ILLNESS (HYPOCHONDRIASIS)

All characteristics of worrying are present including a total daily duration of at least 1 hour, but the worrying is specifically concentrated on the possibility of disease or malfunction in the subject.

Does s/he worry at all about being physically ill?

That there may be something seriously wrong with him/her?
What does s/he worry about?
What does s/he think might happen?
How much does s/he worry about that?
Can s/he stop him/herself worrying?
What happens when you try to reassure him/her?
Has s/he been to a doctor?
What did the doctor say?
How long do the worries last?
When did those worries start?

TOTAL DAILY DURATION OF AT LEAST 1 HOUR.

IF WORRIES PRESENT, CONTINUE. OTHERWISE, SKIP TO "AGORAPHOBIA", (PAGE 4).
EXCESSIVE NEED FOR REASSURANCE

The subject seeks reassurance from others about at least two topics of worry, but the worries continue in spite of such reassurance. Include School-Related Worries/Anxiety, Separation Anxiety, Worries and Hypochondriasis.

Does s/he tell people about his/her worries?

How often?

Do they ever get fed up with hearing about his/her worries?

What happens then?

Can s/he stop him/herself from talking about his/her worries?

Coding rules

EXCESSIVE NEED FOR REASSURANCE

0 = Absent

2 = Seeks reassurance at least weekly (once a week for four consecutive weeks), but not to the extent of interfering with ordinary social discourse.

3 = Seeks reassurance to such an extent that ordinary social discourse with at least one person is interfered with, as evidenced by loss of patience, or avoidance of contact with subject, by that person.
ANXIOUS AFFECT
NERVOUS TENSION
An unpleasant feeling of "nervousness," "nervous tension," "being on edge," "being keyed-up." The feeling is unpleasant, and should have a total daily duration of at least 1 hour.

Is s/he sometimes tense, nervous, or on edge?

How bad is it?
When does that happen?
Does anything bring it on?
Do you know why?
What does s/he feel "nervous" about?
Can you get him/her to calm down?
If s/he concentrates on something, or is doing something s/he likes, does the nervousness go away?

TOTAL DAILY DURATION OF AT LEAST 1 HOUR.

How long does the feeling last?
When did it start?

NERVOUS TENSION
0 = Absent
2 = Nervous tension is intrusive into at least 2 activities and uncontrollable at least some of the time.
3 = Nervous tension is intrusive into most activities and nearly always uncontrollable.

SOCIAL ANXIETY
Subjective Anxious Affect specific to social interactions. There is desire for involvement with familiar people.

Include fear, self-consciousness, embarrassment, and concern about appropriateness of behavior when interacting with unfamiliar figures. Also include fear and anxiety when meeting or anticipating meeting a strange adult.

CONSIDER ALSO SHYNESS.

Does s/he become frightened when s/he has to meet or interact with people s/he doesn’t know well?

Does s/he act frightened when s/he meets new children?

Does s/he get upset when meeting new people?

Or extremely shy?

Does s/her ever become very silly, "showing off" in an anxious fashion?

What happens?
Does s/he try to hide behind you or behind furniture?
Does s/he turn his/her face away?
Or refuse to speak?
Does s/he cry or scream?
Or become agitated?
Does s/he try to leave the room?
How long does s/he remain this way?
Can you help him/her become more comfortable in the situation?
Is s/he able to go to birthday parties and interact with the other children or does s/he stay near you and only watch the activities?
How about on the playground?
What effect has this fear had on X and on your family?
Do you change plans or routine so that s/he can avoid these situations?

AGORAPHOBIA
Subjective anxious affect specific to open spaces or crowds. Typical places and situations relevant to agoraphobia include being outside the home alone, being in a crowd, standing in line, traveling on public transport or by automobile.

Distinguish from acrophobia (fear of heights) when fear of being on bridges, etc. is described.

Distinguish from separation-related anxieties and worries, where the central fears or worries concern separation from attachment figures. When there is doubt as to the correct coding in such a case, code both the appropriate separation-related symptoms and agoraphobia.

Is s/he afraid in open spaces?
Or going out in crowded places?
Or standing in line?
Or using public transportation?
Or riding in automobiles?
Can s/he stop him/herself from being afraid?
Does s/he do anything to avoid it?
Has it affected what s/he does?
What effect has it had?

Startle response may also appear in PTSD section. If so, code in both places.

Does s/he startle more easily than most people?

What sort of things makes him/her jump?
Are these the kinds of things that would make most people jump?
How many days a week does s/he jump like that?

CONCENTRATION DIFFICULTIES
Difficulty in concentrating, or mind "going blank" when feeling anxious.

When s/he feels "anxious" or scared, is it hard for him/her to concentrate?

What happens?
Can s/he focus on a game?
Does s/he seem to jump aimlessly from one activity to another because his/her anxiety makes it difficult for him/her to concentrate?
How many days a week does s/he have this kind of difficulty concentrating?

EASY FATIGABILITY
Child becomes easily fatigued when anxious.

When s/he feels "anxious" does s/he get tired easily?

What happens?
Can s/he continue to play or interact even though s/he is tired out by being anxious?
When s/he's worried or anxious, does she seem to get tired more easily?
Does s/he need more sleep, either during the day as naps or at night?

Definitions and questions

**PANIC ATTACKS**

Panic attacks are discrete episodes of overwhelming subjective anxious affect and autonomic symptoms that reach a peak within 10 minutes of onset, and that the subject usually tries to terminate by taking some definite action, unless they are too “frozen” by panic to do so.

**Does s/he ever get panicky?**

*Has that happened in the last 3 months?*
What happens then?
*Does it affect him/her physically at all?*
When does it happen?
*Does it occur for no good reason?*
*Does it sometimes happen "out of the blue"?*

*How long does it last?*
*What does s/he do?*
*Do you try to avoid situations where you might get panicky?*
*How many times has that happened in the last 3 months?*
*When did it start?*

FOR REVIEW ONLY
DEREALIZATION DURING PANIC ATTACK
The subject experiences his/her surroundings as unreal; everything may seem colorless, artificial, or dead.

When s/he got panicky, did s/he feel that things around him/her didn’t seem real?

Or that it was like a stage set with people acting like robots instead of being themselves?

What was it like?

DEPERSONALIZATION DURING PANIC ATTACK
The subject feels as if s/he is unreal, that s/he is acting a part, that s/he is detached from his/her own experiences.

When s/he got panicky, did s/he feel as if you weren’t real?

Did s/he feel like s/he was acting his/her life instead of being natural?

Did you feel that you were outside your body looking at yourself from outside your body?

FEAR OF LOSS OF CONTROL DURING PANIC ATTACK
Subject feels as though “going crazy” or is afraid of losing control over body or mind (e.g. urinating in public, falling down, creating a “scene”).

When s/he got panicky, was s/he afraid of what s/he might do?

That you might fall down, or create a “scene”?

Did s/he feel like s/he was going crazy?

Or losing control of your mind?

FEAR OF DYING DURING PANIC ATTACK
Subject feels as though s/he might die, or is afraid that s/he might die.

When s/he got panicky, was s/he afraid that s/he might die?
Definitions and questions

CONCERN ABOUT ADDITIONAL PANIC ATTACKS
Concern, worry, or anxious affect related to the possibility that another panic attack may occur.

*Is s/he worried about having another "panic attack"?*
*Does it bother her much?*

CHANGE IN BEHAVIOR
Any change in usual behavior or routines, intended to avoid the possibility of a panic attack recurrence. Or changes in behavior or routine to avoid potential embarrassment or humiliation that the subject fears might result from a panic attack.

*Has s/he done anything to avoid having anymore "panic attacks"?*
*Does that affect your life much?*

WORRY ABOUT IMPLICATIONS
Worry or anxious affect related to possible secondary consequences of having another panic attack.

Do not include such worries or fears during a panic attack which are coded under Fear of Loss of Control During Panic Attack.

*Has s/he been worried about what might happen if s/he had another "panic attack"?*

What does s/he think might happen?
Has s/he been afraid that you might die?
Or go crazy?
Or lose control?

OBSESSIONS, AND COMPULSIONS

Painful, recurrent, repetitive ideas, thoughts, or images that the subject experiences as intrusive and unwanted. Subject regards these as being incompatible with his/her image of him/herself as a person, but does not regard these as being external implants.

OBSESSIONAL THOUGHTS

Painful, recurrent, repetitive ideas, thoughts, or images that the subject experiences as intrusive and unwanted. Subject regards these as being incompatible with his/her image of him/herself as a person, but does not regard these as being external implants.

Does s/he have thoughts that get stuck in his/her mind that s/he can't get rid of?

Does s/he have any awful or ridiculous thoughts that keep coming back into his/her mind even though s/he doesn't want them to?

What kind of thoughts are they?
Does s/he have any silly thoughts or words that won't go away?
Does s/he have any special things s/he thinks about to get rid of horrible things in his/her mind?

What are they?

Does s/he have to count things over and over?

Does s/he have thoughts s/he has to think in a certain way?

Does s/he feel uncomfortable if s/he can't think these thoughts just right?
What makes him/her do it?

Does s/he try and make the thoughts go away?
Do they interfere with other things s/he wants to think about?
Can s/he do anything about it?
Does s/he try not to think about them?
How long do they go on for?
When did they start?

OBSESSIONAL RITUALS
Recurrent, repetitive ideas, thoughts, images, or mental rituals engaged in to reduce or extinguish the mental discomfort generated by Obsessional Thoughts. Performed despite being regarded as excessive, unreasonable, pointless, or absurd.

Occasionally mental rituals may be performed but the subject is unable or unwilling to describe clear Obsessional Thoughts. Such mental rituals may be coded as Obsessional Rituals provided they meet the other criteria for an Obsessional Ritual.

OBSESSIONAL SLOWNESS
Normal actions take an unreasonable amount of time due to internal concerns to do things "correctly" or due to obsessional thought patterns.

Do not include slowness by rituals themselves. Minor degrees of slowness are not rated here.

Does it sometimes take him/her a long time to do things?

Like getting dressed?

Why is that?
What can s/he do about it?

How long does it last?

Depressed Affect

Now we are going to talk about some of X’s feelings. N.B. GET EXAMPLES OF BEHAVIOR AND CONSIDER CODING FOR INCAPACITY

Depressed Mood

Includes feeling unhappy, miserable, blue, low spirited, being down in the dumps or dejected; daily total duration of at least 1 hour.

Distinguish from other unpleasant affects e.g. Nervous Tension or Anxiety, Apathy and Anhedonia. Do not include Depressed Mood induced solely by drug or alcohol use.

Has s/he been feeling "down" at all?

Has s/he been acting very unhappy, or depressed?

Does s/he cry because of this feeling?

What was that like?

Was it serious?

What did you notice?

If I had seen him/her then would I have been able to tell?

What made him/her feel "miserable"?

How much of the time does s/he feel like that?

Does s/he act sad or depressed all the time?

Or only some of the time?

What happens when s/he’s doing something else?

When s/he feels "miserable", how long does it last?

Can you do anything to cheer him/her up?

When did it start?

If Depressed Mood present, ask:

Was there a week when s/he felt "miserable" most days?

Were there two weeks when s/he was "miserable" on at least 8 days?

If Depressed Mood present, ask:

Has there been a period of at least 2 months in the last year when s/he didn’t feel like that?

If "Depressed Mood" is present, continue. Otherwise, skip to "Reported Tearfulness and Crying", (Page 7).

**Depression**
Definitions and questions

DISTINCT QUALITY OF DEPRESSED MOOD
Depressed mood has a subjectively different quality from sadness. Thus the rating should be contrasted with an experience that caused sadness, such as loss of a pet or watching a very weepy film.

Check that the provoking situation is one that is appropriate for sadness. Prompt on such situations if necessary.

*When s/he’s "miserable" does s/he seem to feel the same as when something sad happens or s/he sees a sad movie or program?*

*Is this feeling of "being miserable" different than the feeling of "being sad"?*

*Can you tell me how it is different?*

LOOKS UNHAPPY
Parent’s evaluation that the child characteristically looks unhappy to an extent abnormal for the child’s age or developmental stage.

*Does s/he often look unhappy?*

*Does his/her face seem sad?*
Definitions and questions

**ALLEVIATION OF DEPRESSED MOOD BY SELF-GENERATED MEANS**

Alleviation of depressed mood refers to means that the child may find effective in alleviating his/her depressed mood.

Alleviation by self generated means: The child alleviates mood by actively involving him/herself in other thoughts or activities.

N.B.: BOTH ALLEVIATION BY SELF-GENERATED MEANS AND EXTERNAL MEANS MAY BE PRESENT.

N.B.: ALLEVIATION NOT APPLICABLE IF SUBJECT RATED 0 OR 3 ON "DEPRESSED MOOD". IF "DEPRESSED MOOD" IS NOT PRESENT AS DEFINED IN THE GLOSSARY, IT CANNOT BE RELEIVED. IF THE DEPRESSED MOOD IS PRESENT AT AN INTENSITY LEVEL 3 THEN IT IS, BY DEFINITION, ESSENTIALLY UNALLEVIABLE. CODE AS "NEVER EMPLOYED".

When s/he feels "miserable", can anything cheer him/her up?

What?

Can s/he do things to cheer himself/herself up?

How long would it cheer him/her up? Or make him/her feel better?
Alleviation of depressed mood by external means

Alleviation of depressed mood refers to means that the child may find effective in alleviating his/her depressed mood.

Alleviation by external means: The mood is alleviated by a more passive process in which other activities or events occurring without the child's willful use of them for this purpose alleviated depressed mood.

N.B.: Both alleviation by self-generated means and external means may be present.

N.B.: Alleviation not applicable if subject rated 0 or 3 on "depressed mood". If "depressed mood" is not present as defined in the glossary, it cannot be relieved. If the depressed mood is present at an intensity level 3 then it is, by definition, essentially unalleviable. Code as "never employed".

When s/he feels "miserable," can you or others do anything to cheer him/her up?

Does s/he cheer up when s/he takes part in an activity?

Like playing with other children?

Or going out for ice cream or a treat?

How much of the time would things "cheer" him/her up?

Diurnal variation of mood - AM worst

Persistent (lasting at least 14 days [not necessarily consecutive]) consistent fluctuation within first or second half of the day, irrespective of external events.

The subject must report a difference in the intensity of the depressed mood that is of a degree noticeable to others.

Is there any time of the day when s/he feels more "depressed" or "sad" than others?

Does s/he feel more "sad" in the morning?

What do you notice when s/he feels worse?

How long does the worst time last?
DIURNAL VARIATION OF MOOD - PM WORST
Persistent (lasting at least 14 days [not necessarily consecutive]) consistent fluctuation within first or second half of the day, irrespective of external events.

The subject must report a difference in the intensity of the depressed mood that is of a degree noticeable to others.

Is there any time of the day when s/he feels more "depressed" or "sad" than others?
Does s/he feel more "sad" in the afternoon or evening?
What do you notice when s/he feels worse?
How long does the worst time last?

SUBJECTIVE AGITATION
Markedly changed motor activity associated with depressed mood. Account of a severe level of inappropriate, unpleasant motor restlessness during a period of dysphoric mood, indicated by pacing, wringing of hands, or similar activities; with a total daily duration of at least 1 hour.

DO NOT INCLUDE SIMPLE RESTLESSNESS OR FIDGETINESS IN THE ABSENCE OF MOOD CHANGE.

Does s/he get very restless when s/he's "miserable?"
Does s/he have difficulty keeping still when depressed?
Does s/he wander about without seeming to have a purpose when s/he is depressed?
What is that like?
Can you calm him/her down?
How?

Is s/he always like that?
How about when s/he's not "miserable?"

How long does it last?
When did the "agitation" start?
Definitions and questions

REPORTED TEARFULNESS AND CRYING

Eyes filling with tears or actual shedding of tears as a response to an internal state of unhappiness or misery.

Do not rate crying precipitated by usual precipitants (such as sad situations or anger or being spanked or disciplined).

**Does s/he ever feel so "miserable" that s/he wants to cry?**

Even when it seems that nothing has happened to warrant crying?
What happens then?

**Does s/he actually cry?**

Can s/he stop him/herself?
What does s/he do?
How?

How long does it last?
When was the last time?
Tell me about it.
Does s/he cry more easily than s/he used to?
Does s/he cry more than other children?

When did s/he start being tearful?

TOUCHY OR EASILY ANNOYED

The child is generally more prone to FEELINGS of anger bad temper, short temper, resentment, sulking or annoyance, UNDER MINOR PROVOCATION than most children. This pattern need not represent a change in behavior.

**Do things get on his/her nerves easily?**

What sorts of things?

**Does s/he get annoyed more easily than most children, do you think?**

What does s/he do?

How often does that sort of thing happen?

How long has s/he been like that?

CONATIVE PROBLEMS

BOREDOM

Activities the child is actually engaged in are felt to be dull and lacking in interest while interest in other possible potential activities is expressed.

Everyone gets bored sometimes, so code a child positively here only if s/he is more often bored than not. But code positive even if the activities are truly dull. It must seem to the child that other potential activities would be of interest even if s/he is uncertain what those other activities might be.

Differentiate from anhedonia and loss of interest, where nothing seems to be of potential interest or likely to give pleasure.

Code even if the activities described are truly boring in your opinion.

How much of the time is s/he bored, do you think?
Does s/he get bored more than other people?
IF PRESENT ASK;
What activities are boring to him/her?
Can s/he do anything to stop from being bored?
Is there something that s/he would like to be doing?
How long has s/he been feeling so bored?

Codes

BOREDOM
0 = Absent
2 = More than half the time.
3 = Almost all the time.
**LOSS OF INTEREST**

Diminution of the child's interest in usual pursuits and activities.

Either some interests have been dropped or the intensity of interest has decreased. Everyone has interests of some sort, but the extent of the diminution must be measured in the context of the range and depth of the child's usual activities. Take into account everyday school and home activities as well as watching TV, playing games, taking an interest in clothes, food, appearance, toys, etc. Inevitably, those with more intense and varied interests initially will have more room to lose interest than those who have never taken a great interest in things.

Distinguish from "growing out" of activities or giving up certain activities to take up new ones or because of increased pressure of work.

**NOTE INFORMATION FROM THE OUT OF SCHOOL ACTIVITIES SECTION**

*Have things been interesting him/her as much as usual?*

*Like his/her toys or friends?*

*Have you noticed that s/he isn't interested in doing things that s/he used to care a lot about?*

In the definitions in this section the term "feeling" is frequently used, despite the fact that cognitions are being referred to. For most people, the term "feeling" carries both cognitive and affective components. However, these items refer not to mood states per se, but to certain cognitions, thoughts, opinions or attitudes. In other words, it is the content of the thought that is to be coded, not its affective tone.

**LONELINESS**

A feeling of being alone and/or friendless, regardless of the justification for the feeling; total daily duration of at least 1 hour.

**NOTE RELEVANT INFORMATION FROM PEER RELATIONSHIPS.**

_Do you think s/he feels lonely?_

- How often is that?
- When was the last time?
- How did s/he feel then?

_Sometimes children feel that they have no one who would help them. Does s/he ever feel like that?_

- Does s/he feel cared for by friends?
- Does s/he feel lonely even though s/he has some friends?
- Does s/he feel left out by others?
- Does s/he get left out of other children’s activities?
- How does s/he feel about that?
- Does s/he think that’s likely to change?
- Can you stop him/her feeling lonely?
- What happens if you try?

- When did s/he start to feel lonely like that?
Definitions and questions

FEELS UNLOVED
A generalized feeling of being unloved and uncared for, regardless of the justification for that feeling.

DIFFERENTIATE FROM LONELINESS.

RELEVANT INFORMATION TO CODE THIS ITEM MAY HAVE EMERGED IN THE FAMILY LIFE AND RELATIONSHIPS SECTION.

Sometimes children feel that no one loves them, even when they do. Does X feel like that at all?

What does s/he say?
Does X feel like s/he is loved less than other people?
Is s/he completely convinced that no one loves him/her?

When did s/he start to feel like that?
Who loves him/her?
Is there anyone else?

Coding rules

FEELS UNLOVED
0 = Absent
2 = The subject feels that there are others who love him/her but that s/he is loved or cared for less than other people.
3 = The subject feels that almost no one loves him/her, or hardly ever believes that anyone does.
SELF-DEPRECIATION AND SELF-HATRED

An unjustified feeling of inferiority to others (including unjustified feelings of ugliness). Self-hatred involves severe hostility directed by the child against him/herself, accompanied by expressed dislike or expressed criticism.

Do not rate delusional phenomena here.

How do you think s/he feels about him/herself?

Does s/he like him/herself?

How does s/he feel about his/her appearance (looks)?
What is s/he like compared with others?
If s/he had to choose, would s/he say s/he was good-looking, average, or ugly?

Does s/he ever say that s/he is "stupid"?
Or a "jerk"?
Or a "bad" person?
How ugly does s/he think s/he is?
Does s/he feel much worse-looking than most people?
How much of the time does s/he feel like that?

Does s/he feel that she is good at certain things?

What things does s/he do that s/he is proud of?

Is there anything that s/he thinks s/he's good at?
As a person does s/he feel as good as other people?

Does s/he think s/he's any good at all?
Does s/he think everyone is better than s/he is?

When did s/he start to feel like this?

SELF-DEPRECIATION

0 = Absent
2 = The subject rates him/herself lower than seems justified, but does not see him/herself as being completely without value, since in some activities s/he does not feel inferior.
3 = The subject feels almost entirely worthless and without saving graces, in nearly all activities, or inferior to everyone. Self-hatred is also rated here.

DEPRESSION

FEELING SORRY FOR ONESELF

A feeling that life or people have been unfairly unpleasant or troubling and that the child deserves better. Child feels unlucky, victim of "bad luck".

Code regardless of justification.

Does s/he feel sorry for him/herself?

Does s/he think s/he's unlucky?

Does X feel that s/he deserves a better life?

In what way?

Does s/he feel like that all the time or only some of the time?

When does s/he feel like that?

Does s/he think everything is unfair or just some things?

Does s/he complain about it?

How much?

Does s/he feel it will always be like that?

When did s/he start to feel like that?
PATHOLOGICAL GUILT
Excessive self-blame for minor or non-existent wrongdoings. Child realizes that guilt is exaggerated (otherwise, code as Delusions of Guilt).

Does s/he feel bad or guilty about anything that s/he's done?

What?
How often does s/he feel like that?  
When was the last time?
Does s/he ever say that s/he is a "bad" person?

Does s/he blame him/herself for things that aren't his/her fault?

Why?
Does s/he feel that s/he deserves to have bad things happen to him/her?  
Does s/he think s/he deserves to be punished, even when s/he has done nothing wrong?  
Does s/he ever feel guilty about things that s/he knows aren't really his/her fault?  
Does s/he feel that a lot of things that go wrong are his/her fault?

IF PATHOLOGICAL GUILT IS PRESENT, CONSIDER DELUSIONS OF GUILT.

When did s/he start to feel that s/he was "to blame?"

IF NO PATHOLOGICAL GUILT, SKIP TO "IDEAS OF REFERENCE", (PAGE 22).

 Definitions and questions

**DELUSIONS OF GUILT**

Delusional self-blame for minor or non-existent wrongdoings. Child DOES NOT realize that guilt is exaggerated.

The child may believe that s/he has brought ruin to his/her family by being in his/her present condition or that his/her symptoms are a punishment for not doing better. Distinguish from pathological guilt without delusional elaboration, in which the child is in general aware that the guilt originates within him/herself and is exaggerated.

**Does s/he believe that s/he has committed a crime?**

Or **sinned greatly?**

Does s/he think that s/he deserves to be punished? 
Does s/he think that s/he might hurt or ruin other people? 
What does s/he say? 
Can you persuade him/her that these things aren't his/her fault? 
What does she do about it?

IDEAS OF REFERENCE

Subjective feeling of being noticed or commented about in public settings that are not justified by reality. Comments seem to be mocking, critical, or blaming. Do not include situations in which the description offers evidence that subject actually was being noticed or commented upon.

IF IDEAS OF REFERENCE ARE PRESENT, CONSIDER WHETHER THERE ARE DELUSIONS.

Sometimes people get the feeling that other people are looking at them even when they know they aren't really. Does that happen to you?

When was the last time?
Can you tell me about that?
What do you think people think or say when you feel that they're noticing you?

Do you ever feel that people are talking about you?

Do you ever feel they might be laughing at you or saying rude things about you?
Do people follow you or watch you?
How do you know they are?
Are you imagining it?
Are people blaming you for something? What?
Are people accusing you of something? What?
How do you know they are?
What do they do?
Do you think they really are or are you just being sensitive?

Definitions and questions

**HELPLESSNESS**

The child feels that there is little or nothing s/he can do to improve his/her situation or psychological state, though such a change would be welcome. This is a generalized feeling.

*Is there anything about the way things are or the way s/he is that s/he would like to change?*

Does s/he feel helpless about his/her situation? IF PRESENT ASK;

*Is there anything s/he thinks s/he could do to make things better?*

Or make him/herself feel better?

What?

Does s/he think it would work?

When did s/he start to feel this way?

**HOPELESSNESS**

The child has a bleak, negative, pessimistic view of the future, and little hope that his/her situation will improve. This is a generalized feeling.

*Does s/he seem hopeless about the future?*

Does X think things will get better or worse for him/her when s/he’s grown up?

How often?

Does s/he think anyone can help him/her?

Does s/he believe things will be better?

How often does s/he feel like that?

Can you do anything about it?

When did s/he start to feel this way?

SUICIDE

Purposes of the Section

This section has 1 major function:

(1) To assess the suicidal and self injurious intentions and actions of the child.

Organization of the Section

The section is organized in 2 sub areas:

(1) Suicidal ideation and behavior.

(2) Non suicidal deliberate self harm.

SUICIDE AND SELF-INJURIOUS BEHAVIOR

Has s/he ever talked about death or dying?

Has s/he done so in the last three months?

Has s/he ever said s/he wanted to die?

Has s/he ever said life was not worth living?

Has s/he ever tried to hurt or kill him/herself?

When?
Why was that?
What happened?

Has s/he tried more than once?

Has s/he ever done anything that made people think s/he wanted to die?

What?
When was that?
What happened?

CONTINUE WITH SECTION REGARDLESS WHETHER SCREEN POSITIVE OR NEGATIVE.

How about in the last three months?
THINKING ABOUT DEATH
Thoughts about death and dying, whether referred to self or others.

Include thoughts about not being able to go on any longer and life not being worth living. Include discussion about a grandparent who has died ("Do they go to heaven?" "What will happen when I die?") To code, thoughts must be intrusive into at least two activities.

CODE THOUGHTS ABOUT TAKING ONE’S OWN LIFE UNDER SUICIDAL THOUGHTS (NEXT PAGE).

Does s/he seem to think about death or dying?
What does s/he think about?
How much does s/he think about it?
Does s/he sometimes wish s/he were dead?
Does s/he want to die?
Why does s/he feel like that?

How long has s/he been thinking like that?

SUICIDAL THOUGHTS
Thoughts specifically about killing oneself, by whatever means, with some intention to carry them out.

This may accompany thinking about death in general, or may be present if a child has reported a suicidal plan or past attempt.

Do not include suicidal plans.

Does s/he ever think about ending it all?
What does s/he say about it?
When was the last time?
What does s/he think about?
Have there been other times?
Do you think s/he actually is going to do this?

IF SUICIDAL THOUGHTS NOT PRESENT, SKIP TO "SUICIDAL ATTEMPTS", (PAGE 26).
SUICIDAL PLANS
Suicidal thoughts that contain plans of a suicidal act and some intent to carry them out.

If suicidal attempt has been made, determine whether a plan was present prior to the attempt.

Has s/he thought about actually killing him/herself?

Has s/he had a plan?

Has s/he thought what s/he might do?
Do you think s/he might do this?
Has s/he done anything to prepare for killing him/herself?
What?
How did you find out?

SUICIDAL ATTEMPTS
Episodes of deliberately self-harmful behavior involving some intention to die at the time of the attempt. Rate here, no matter how unlikely the attempt was to cause death, so long as the child’s intention was to die. If parent unsure about intention to die, code if the parent can describe a clear self-harmful event.

Has s/he ever actually tried to kill him/herself?

What happened?
Where did s/he do it?
Were there any people around at the time?
Do you know how s/he was feeling then?
Did s/he really want to die?
What happened?
Who found him/her?
Did s/he go to the hospital?

When did s/he first try to kill him/herself?
When did s/he last try to kill him/herself?

How many times has s/he tried?

How does s/he think about it now?
Would s/he do it again if s/he had the chance?
Does s/he still wish s/he were dead?
Is there anything you can do about that?

SUICIDAL INTENT
Code the highest level of suicidal intent manifested in an attempt. Do not include potentially self-injurious behavior without suicidal intent here.

Which time was s/he most serious about killing him/herself?
What did s/he do?
Do you think s/he really wanted to die?

IF ATTEMPT IN THE PAST 3 MONTHS, ASK;
Was s/he serious about killing him/herself when s/he tried in the last 3 months?

LETHALITY OF SUICIDAL ATTEMPT
Code here the degree of threat to life resulting from the most serious suicidal attempt.

SUICIDAL INTENT
1 = Subject reports minimal intention to actually kill him/herself, but either revealed the attempt to others, or otherwise ensured that there was little risk to take his/her life.
2 = Substantial intent to kill self, but associated with ambivalence to a sufficient degree that the intention was not absolute.
3 = Absolute (or almost absolute) intention to commit suicide, expressed with little or no ambivalence or uncertainty. If uncertain whether to code 2 or 3, code 2.

LETHALITY OF SUICIDAL ATTEMPT
1 = Mild: No Medical attention needed or sought.
2 = Moderate: Some medical attention sought or required (e.g., sewing up cuts, stomach lavage).
3 = Serious: The attempt resulted in unconsciousness, the need for resuscitation, assisted respiration, blood transfusion, or operative intervention.
ALCOHOL OR DRUG INTOXICATION AT TIME OF SUICIDE ATTEMPT
Alcohol or drug consumption prior to attempt sufficient for subject to be experiencing effects at time of attempt.

When s/he tried to kill him/herself, had s/he had anything to drink?

Had s/he used any drugs?

How long was that before s/he tried to kill him/herself?
Was s/he drunk?
Was s/he high?
Was the alcohol (drug) having any effect on you at the time you tried to kill yourself?

Were you drunk or high when you tried in the last 3 months?

"SUICIDAL" BEHAVIOR WITHOUT INTENT
Actions threatening suicide, without intention of ending life, e.g., taking a gun and threatening to shoot oneself, in order to control others' behavior.

Has s/he done anything that made people think s/he wanted to die?

Why did s/he do it?
When was the first time?

INTOXICATION AT TIME OF ATTEMPT
0 = Absent
2 = The subject had drunk alcohol or used drugs but was not showing marked effect at the time of the attempt.
3 = Definitely intoxicated, drunk or high at time of attempt.

"SUICIDAL" BEHAVIOR WITHOUT INTENT (IN LAST 3 MONTHS)
0 = Absent
2 = Present

Self-mutilation, etc., not accompanied by any wish or intention to die (e.g., cutting on skin with a knife, buring self, deliberately putting finger in door jam and closing door, wrist-slashing or cigarette burns). Do not include self-inflicted burns or tattooing or carving initials on skin to demonstrate "toughness" or gang or subgroup membership.

BEHAVIORAL DESCRIPTIONS.

EXPANSIVE MOOD
Feelings of euphoria or elation, lasting at least 1 hour at a
time, which represents a substantial change from the
child’s usual mood and which are not a response to specific
situations.

Do not include drug/alcohol induced euphoria.

Do not include responses to happy events (such as
birthdays, sporting victories, falling in love, etc.).

IF EXPANSIVE MOOD IS PRESENT BE PREPARED TO

Definitions and questions

**IRRITABILITY WITH EXPANSIVE MOOD**
If both Irritability and Expansive Mood have been present together, or within the same 24 hour period, then code here.

**DEPRESSED MOOD WITH EXPANSIVE MOOD**
Both Depressed Mood and Expansive Mood present within same 24 hour period. Either the two moods must both separately meet the criteria for each, or if the two rapidly alternate, the two taken together must last at least one continuous hour at a level that meets the other minimum criteria.

*Were there times when s/he was both "really happy" and "depressed" on the same day?*

Tell me about that.
Was s/he usually like that?
Or was s/he usually either one or the other?
How long did it last?

When did s/he start to get the "depression" and "feeling really happy" so close together?

*Has there been a period of at least 2 months during the last year when s/he didn't have either "depressed mood" or "expansive mood"?*

**MORE TALKATIVE THAN USUAL**
Child is more talkative than usual. Speech may be loud, rapid, nonstop, or difficult to interrupt during periods of Expansive, Expansive/Irritable, or Irritable Mood.

Distinguish from chattiness.

*Were there times when s/he was more talkative than usual?*

RACING THOUGHTS

A description of many images and ideas flashing through the mind or many ideas arising quickly.

Has s/he had times when s/he’s had racing thoughts?

Has s/he ever said s/he has too many thoughts?

Did so many ideas come out that you could hardly keep up with them?

Has s/he ever expressed that his/her thoughts were like a traffic jam?

Coding rules

RACING THOUGHTS

0 = Absent

2 = Child describes periods of racing thoughts. These thoughts are intrusive into at least 2 activities.

3 = Racing thoughts occur regularly and frequently.

SUBJECTIVE FLIGHT OF IDEAS

A subjective description of images and ideas flashing through the mind, when in Expansive or Expansive/Irritable Mood, or Irritable Mood. Lasting at least 1 hour in daily total.

**Has s/he had times when lots of thoughts flashed through his/her head one after the other very fast?**

**Did s/he keep jumping from one thing to another?**

Did his/her words come so fast that you could hardly keep up with them?
Could you follow what s/he was saying?
What did you think of his/her ideas at the time?
Would s/he shift topics because words rhymed with each other?
Or because one word suggested some new subject?
Could you follow his/her thoughts or did they seem confusing?
Could you do anything to slow him/her down?
How long did it last?

When did it start?

SUBJECTIVE PRESSURE OF SPEECH

A description of periods of talking fast, with a sensation of pressure to get words and ideas out, when in Expansive or Expansive/Irritable Mood, or Irritable Mood.

**Was s/he talking very fast?**

Could you get a word in edgewise?

Did it seem like s/he could not stop talking?
Did s/he rattle on, even if you tried to interrupt?
How long did that last?

When did you first notice it?

SUBJECTIVE MOTOR PRESSURE

Feeling of increased physical energy or capacity expressed in motor behavior, when in Expansive or Expansive/Irritable Mood, or Irritable Mood.

Has s/he had times when s/he felt really energetic?

What did s/he do?
When s/he was feeling "super happy" or silly, did s/he do any physical activities that s/he wouldn’t normally?

Was s/he rushing around all over the place?

What did you notice?
Was s/he able to do anything useful?
Or did s/he seem to be out of control?
What did you and other people think of his/her activities?
Was s/he moving faster than usual?
Could you do anything to slow him/her down?

When did this first happen to him/her?

SUBJECTIVE AGITATION

Markedly changed motor activity associated with Expansive or Expansive/Irritable or Irritable Mood, with a total daily duration of at least 1 hour. Account of a severe level of inappropriate, unpleasant motor restlessness during the mood state, indicated by pacing, wringing of hands, or similar activities.

Do not include simple restlessness or fidgetiness in the absence of mood change.

Does s/he get very restless when s/he’s "miserable" or super up or happy?

Does s/he have difficulty keeping still?

What is that like?
Can s/he keep him/herself still?
Does s/he have to move around?
Is s/he always like that?
Does s/he pace about?
Or wring his/her hands?
How about when s/he is not feeling "over the top" or irritable like that?
Definitions and questions

UNUSUALLY ENERGETIC
During waking hours, subject is more active than usual without expected fatigue. Or subject demonstrates little fatigue in spite of maintenance of normal activities.

Has s/he had more energy than usual to do things without getting tired?

Did s/he seem to go 'non-stop' without getting worn out?

Did it ever seem that s/he had too much energy?

What was s/he like then?

DISTRACTIBILITY
Inability to screen out irrelevant external stimuli during the period of mood disturbance. May have difficulty keeping thoughts on themes relevant to the topic.

When s/he is feeling this way, does s/he have difficulty paying attention when s/he can look out of the window or hear other people talking in the next room?

Does s/he find him/herself easily distracted by things going on around him/her?

Like the furnishings in a room?
Or someone’s tie?
Can you give me an example?
Is it like that in all activities or just some?
Can s/he stop him/herself from getting distracted?
Is that all the time or just sometimes?

DECREASED NEED FOR SLEEP
During the period of mood disturbance, child feels adequately rested with at least 1 hour less sleep than usual per night, for at least 1 week.

Differentiate from Insomnia, where reduced sleep is associated with a feeling of being inadequately rested.

When s/he was "super happy" or silly, did s/he need as much sleep as usual?

How much sleep was s/he getting?

Was s/he on the go all the time?
Did she disturb you at night?
What did she do?

When did that start?

GRANDIOSE IDEAS AND ACTIONS
An unusually increased level of self-esteem or self-appraisal of worth, such as the feeling of being superbly strong, or exceptionally able, or intelligent, when in Expansive or Expansive/Irritable Mood or Irritable Mood.

Distinguish from fantasy play unrelated to mood changes.

When s/he’s “super happy” or silly, are there any times when s/he feels that s/he is a really great or marvelous person?

Such as a super-hero?
Did s/he think that s/he has special powers?
Like s/he could fly?
Or be invisible?

Did s/he think s/he was as powerful and strong as grown-ups?

What did s/he do when s/he felt like that?

When s/he thinks s/he’s in charge, thinks s/he’s especially talented, etc., how long does it generally last?

When did s/he start to feel like that about him/herself?

SEXUAL LANGUAGE
Does s/he talk about body parts?

Does s/he use dirty or sexual language?

SEXUALLY ABUSED
Do you have any reason to suspect that s/he has been sexually abused in any way?

POOR JUDGMENT (HYPOMANIA AND MANIA)
Uncharacteristic behaviors performed with disregard for possible negative consequences during Expansive or Expansive/Irritable Mood state or Irritable Mood.

Did s/he do anything silly or dangerous when s/he was "high"?

Or anything that s/he regrets doing?

What did s/he do?

Did s/he get into any trouble when s/he was "high"?

What happened?

Has that left him/her with any problems?

What’s happening about that?

What do you think about it?

When did s/he first do something like that?

2 = Behavior that involved definitely poor judgment but which was within the range of socially acceptable irresponsible behavior (e.g. speaking rudely/impertinently to other people, being physically reckless or aggressive).

3 = Behavior that is outside the range of socially acceptable irresponsible behavior (e.g. being overtly insulting to figures of authority, undressing in a public place), or dangerous behavior (e.g., jumping off a roof because child believed s/he could fly) and hence likely to result in some negative consequences.
**Definitions and questions**

**INAPPROPRIATE LAUGHING, JOKING, GRINNING**
Subject demonstrates laughing, joking, grinning in a manner incongruent to context.

*Does s/he just laugh for no reason when nothing funny happened?*

*Does s/he laugh uncontrollably?*

*Does s/he laugh out when it's inappropriate (e.g., church, preschool during lesson)?*

**UNINHIBITED/GREGARIOUSNESS**
The subject is willing to be friendly toward almost any adult or child, to a degree unusual for his/her developmental age, social group, and familiarity with the person. The subject demonstrates reduced or absent reticence around unfamiliar people.

*Does s/he start a conversation with anyone - adult or child?*

*Is s/he the type of child who has no hesitation to engage in conversation with a stranger?*

*Are you concerned that s/he would talk inappropriately to strangers?*

*Are you concerned that s/he would run off with a stranger without any hesitation or reserve?*

*Does s/he seem to know everyone in his/her preschool or child care?*

MOOD CYCLING
Child exhibits significant and abrupt mood changes.

Does it seem like X’s mood can change ‘on a dime?’
For example, going from being very happy to very irritable or sad in a short time?
Does X’s mood changes often and quickly?

INCREASE IN ADAPTIVE ACTIVITY AS COMPARED WITH USUAL LEVEL
increased appropriate involvement or activity during periods of Expansive or Expansive/Irritable Mood or Irritable Mood.

Do not include responses to there being a sudden need to meet deadlines or to avoid punishment.

Or was the opposite true?
Could s/he work better or more efficiently than usual?
How did s/he get along with you?
When did that first happen?
How did s/he get along with friends when s/he was “high”?

Did s/he get more done?
Did s/he take more interest in things than s/he normally likes doing?
When s/he felt “so good” did it affect his/her work?
Did s/he get more involved in things than s/he normally does?

MOOD CYCLING
0 = Absent
2 = Child displays abrupt changes in mood. These occur spontaneously (for no apparent reason) or in response to minor disappointments or most limit-setting.
3 = Child frequently and continuously displays spontaneous and abrupt changes in mood or child displays abrupt mood changes to nearly all disappointments or limit-setting.

INCREASE IN ADAPTIVE ACTIVITY
0 = Absent
2 = Increase in adaptive activity in at least 2 activities.
3 = Increase in adaptive activity in almost all activities.

FOR REVIEW ONLY
HYPERACTIVITY

Now I would like to ask you about how active X is and how well s/he concentrates. Because a child (young person) often varies in the ways s/he behaves, I want to focus on different sorts of activities.

OVERACTIVITY

Organization of the Section

The structure differs somewhat from the rest of the interview, on account of the requirements of different diagnostic systems. There are three subareas: overactivity, inattention, and impulsivity. Summary ratings are made for each subarea.

Note, however, that the concept of controllability has an additional feature here, as with many other items relevant to oppositional and conduct disorders, in that control by admonition by others is added to the usual notion of self-control. Thus it is necessary to find out whether being admonished or disciplined for the occurrence of these items brings them under control. Additionally, if a parent must exert a great amount of effort to control the child’s behavior, or has given up trying to control the child’s behavior, this is to be regarded as evidence of uncontrollability and intrusiveness.

We are looking here for patterns that are characteristic of the way that the child acts. Thus, if an example is given that happened only once or twice and was uncharacteristic of the child, it does not count here.

The question is does s/he control the behavior, not can/could s/he control it if s/he wanted to (or if s/he weren’t disobeying or being naughty). Many parents are convinced that their children could exercise such control, if they only would; this belief is not to be regarded as evidence of controllability.

Ten minute rule
Some behaviors are not rated if the child is able to stop them, when told to, for at least 10 minutes (without being reminded within the 10 minutes). The 10 minute rule refers to an average of ten minutes. If the admonition must be repeated within a short space of time (10 minutes), then the child's behavior is regarded as not being responsive to admonition and therefore the behavior is not regarded as being controllable.

The 10 minute rule applies to Fidgetiness, Difficulty Remaining Seated When Required, and Difficulty Concentrating on Tasks Requiring Sustained Attention. boxes. It may be applied to Talks Excessively and Doing Things Quietly if one is having difficulty making a general determination. For the other generalized items and the items in the Impulsivity section, control for 10 minutes is not relevant.

Clearly, there is a great range in children of different ages regarding levels of activity, impulsivity, and the ability to control activity and impulsivity. For example, most two or three year olds have more difficulty sitting at the dinner table than five or six year olds. Nonetheless, code the behavior as described by the parent and defined in the Glossary.

FIDGETINESS

Unnecessary movements of parts of the body when stationary overall (e.g. tapping of feet, squirming in seat).

First I'd like to talk about how active s/he is.

How much does s/he squirm or wiggle in his/her seat?

How much does s/he fidget with his/her hands or feet?

Is that more than other children?

What does s/he do?

Is it like that in all activities?

Or just some activities?

Can s/he stop him/herself?

All the time?

Were there any times in the last three months when s/he couldn't stop him/herself?

How often?

How long does s/he keep from fidgeting in an hour?
IF FIDGETINESS ABSENT, SKIP TO "DIFFICULTY REMAINING SEATED WHEN REQUIRED (RESTLESSNESS)", (PAGE 5).
FIDGETINESS - SITUATIONAL SPECIFICITY
Rate in the following 3 situations:

a) Fidgetiness while playing or involved in an activity that the child regards as interesting at home.

b) Fidgetiness during the most interesting activity at school/daycare.

c) Fidgetiness during an interesting activity elsewhere (not at home, not at school).

INTERVIEWER SHOULD USE INFORMATION ALREADY OBTAINED TO MAKE OVERALL RATINGS FOR FIDGETINESS.

You've told me that s/he can be fidgety.
Is s/he like that at home when doing something that is interesting?
Is s/he like that at daycare/school during an interesting activity?
Is s/he like that elsewhere when doing something interesting?
What about during circle-time at daycare or school? Are there other times when that happens?
Is it like that everywhere?
Can s/he stop him/herself from being like that?
What about if you tell him/her to stop?
Or his/her caregiver/teacher?
How long can s/he stop for?
When did s/he start being like that?

RESTLESSNESS - SITUATIONAL SPECIFICITY

Increased unnecessary whole body movements (e.g. getting up and moving around).

Rate in the following 3 situations:

a) Restlessness while playing or involved in an activity that the child regards as interesting at home.

b) Restlessness during an interesting activity at daycare/school.

c) Restlessness during an interesting activity elsewhere (not at home, not at daycare/school).

Is s/he able to concentrate when doing something alone?

Like playing?

Does this happen in any of the activities we talked about? What does s/he do? Is it like that in all activities? Or just some activities?

DIFFICULTY ORGANIZING TASKS AND ACTIVITIES

Difficulty organizing tasks and activities when structure is not imposed by others (e.g., at a loss to start or structure a project, to have all the right materials on hand to play a game, build a train track, etc.)

How is s/he at organizing a task or activity?

Like doing a project? Can s/he gather all materials needed to play a game? Or setting up a game? Does s/he know where to start?

If s/he gets started, does s/he then get disorganized?
Definitions and questions

DIFFICULTY FOLLOWING THROUGH ON INSTRUCTIONS FROM OTHERS AND FAILS TO FINISH TASKS AND ACTIVITIES

How good is s/he at following through on instructions from others?

Does s/he tend not to complete things s/he’s been asked to do?

What about with things s/he’s been told to do?

What does s/he do?
Is it like that in all activities?
Or just some activities?
Does s/he complete things if s/he makes an effort?
Is that all the time?
Or just sometimes?
What about if you ask him/her to follow through?
Does that happen at daycare/school as well as at home?

AVOIDS TASKS REQUIRING SUSTAINED MENTAL EFFORT

Does ‘X’ try to get out of things where s/he will have to concentrate?

Like doing a puzzle or trying to write his/her name?

Can you get him/her to do such things?
What does s/he do?
Is it like that in all activities?
Or just some activities?

EASILY DISTRACTED BY EXTRANEOUS STIMULI

Does s/he have difficulty paying attention when s/he can look out of the window or hear other people talking in the next room?

Is s/he easily distracted by things going on around her?

Are these things that would distract anyone?
What does s/he do?
Is it like that in all activities?
Or just some activities?
Can s/he stop him/herself?
Is that all the time or just sometimes?
What about if you ask him/her to pay attention?
FORGETFUL IN DAILY ACTIVITIES
Forgetful in daily activities (e.g., forgets to brush teeth or hair, or to do simple chores).

*Is s/he often forgetful in his/her daily activities?*

*Can you give me an example?*

OFTEN LOSES THINGS THAT ARE NECESSARY FOR TASKS/ACTIVITIES AT DAYCARE/SCHOOL OR AT HOME
Loses clothing, toys, etc.

*Does s/he lose things more than other kids do?*

*Does s/he lose things s/he needs for daycare/school?*

Does s/he leave things, like toys or clothing, at daycare/school or friend’s house?
Does s/he get into trouble for losing things?
What does s/he do?

OFTEN DOES NOT SEEM TO LISTEN TO WHAT IS BEING SAID TO HIM/HER

*Do you think s/he’s good at listening to what you say to him/her?*

*Do people complain that s/he doesn’t seem to listen to what they are saying to him/her?*

How can you tell?
Does this happen across activities?
What does s/he do?
*Is it like that in all activities?  Or just some activities?*

FAILS TO PAY CLOSE ATTENTION TO DETAILS

How good is s/he at paying attention to details when s/he is working on something?

Does s/he tend to do things incorrectly or sloppily because s/he hasn't paid enough attention to the task?

Do his/her projects show that s/he doesn't pay attention to details?
What does s/he do?
Is it like that in all activities?
Or just some?
Can s/he make him/herself pay attention to details?
What about if you ask him/her to pay attention?
How often does s/he fail to pay close attention to details?

MAKES CARELESS MISTAKES

Does X make a lot of careless mistakes?

Does that affect his/her schoolwork/work?

Is it like that in all activities or just some?
Can s/he stop him/herself?
All the time or just sometimes?
What about if you ask him/her to stop?

IF INATTENTION ABSENT, SKIP TO "DIFFICULTY WAITING FOR TURN IN GAMES OR IN GROUP SITUATIONS", (PAGE 14).
INATTENTION - SITUATIONAL SPECIFICITY

Failure to maintain sufficient involvement to allow proper completion of an age-appropriate and developmentally-appropriate task.

Rate in the following 3 situations:

a) Inattention while playing or involved in an activity that the child regards as interesting at home.

b) Inattention during an interesting activity at daycare/school.

c) Inattention during an interesting activity elsewhere (not at home, not at daycare/school).

INTERVIEWER SHOULD USE INFORMATION ALREADY OBTAINED TO MAKE OVERALL RATINGS FOR INATTENTION.

You've told me that s/he has difficulty paying attention.

Is s/he like that at home when doing something that is interesting?

How about at daycare/school during an interesting activity?

How about elsewhere when doing something interesting?

Are there other times when that happens?
Is it like that everywhere?
Can s/he stop him/herself from being like that?
What about if you tell him/her to stop?
Or his/her caregiver/teacher?
How long does s/he stop for?

When did s/he start being like that?
IMPULSIVITY

DIFFICULTY WAITING FOR TURN IN GAMES OR IN GROUP SITUATIONS

Distinguish from normative eagerness.

Can s/he wait his/her turn for things?

As well as most children his/her age?

At daycare/school can s/he stand in line with the other children?
Or participate in circle time?
At home can s/he wait his/her turn during a game?
Why does s/he push in?
Does it get him/her in trouble?
Can s/he control it?
What if others say something?

Distinguish from normative eagerness and excitement and desire to participate in social interactions.

**Does s/he tend to interrupt other people when they're talking to someone else?**

**What about butting into games without being invited to join in?**

How often does that happen?
Does it happen as much as half of the time?
Can you give me an example?

FAILURE TO HONOR FINANCIAL OBLIGATION

Subject has not paid money s/he owes, or has not repaid money s/he has borrowed. The debt may have arisen prior to the last three months, but the failure to pay has been ongoing in the last three months. If two or more weeks have passed since the debt was incurred (or bill was due) and payment has not been made, code failure to honor the commitment despite assurance the subject plans to pay in the future. Code failure to pay child support more specifically below.

Over the last three months, has s/he owed anyone any money?

Or borrowed any money?

Did s/he pay the money back?

Were there any times in the last three months when s/he didn't pay someone the money s/he owed or borrowed?

Did s/he have any financial obligations that s/he did not honor?

How many times over the last three months has s/he owed someone money but didn't pay them?

When was the first time s/he didn't pay money s/he owed?

CHILD LIVING ELSEWHERE

Does s/he have any children who don't live with him/her?

IF SUBJECT HAS A CHILD THAT LIVES ELSEWHERE, COMPLETE. OTHERWISE, SKIP TO "FINANCIAL CONSEQUENCES", (PAGE 2).
Definitions and questions

FAILS TO PAY CHILD SUPPORT

*Is there a court order that requires him/her to pay child support?*

*Has s/he paid child support?*

*Has s/he missed any payments in the last three months?*  
**NOTE: IF NO COURT ORDER ASK**

*Does s/he contribute money for the child's upbringing even though it is not court-ordered?*

FINANCIAL CONSEQUENCES

*Has s/he ever had a car or other possessions repossessed?*

*Has s/he had debts turned over to a collection agency?*

*Has s/he been unable to pay his/her rent?*

Coding rules

FAILS TO PAY CHILD SUPPORT

0 = Pays either court-ordered child support or voluntarily contributes more than $20 per month to child's upbringing.

1 = Does not contribute financially, or less than $20 per month.

2 = Has missed at least one court-ordered child support payment in the last three months.

EVER: FINANCIAL CONSEQUENCES

0 = Absent

2 = Present
LACK OF REMORSE
Lack of remorse, as indicated by being indifferent to or rationalizing having hurt, mistreated, or stolen form another. Subject steals, cheats, mal treats people or otherwise breaks clear societal boundaries without guilt. Taking inexpensive items or small amounts of money are considered stealing if the owner was not informed and is deprived of the use of the item. Do not code for white lies told to spare the feelings of others.

Does X feel badly when s/he does something wrong?
Does s/he feel guilty if s/he lies?
Or cheat?
Or steal?
Has s/he hurt anyone over the last three months?
Can you give me an example?
How many times has s/he done something like that over the last three months without feeling badly about it?
When did s/he start doing things like that and not feeling bad about it?

HARASSMENT
Repeated or persistent infringement that causes annoyance or torment to another person.

Over the last three months, has s/he called someone on the phone, just to make them feel annoyed?
Or to make them feel frightened?
Can you tell me a little about that?
Has s/he just shown up at someone’s house or property?
Why did s/he go there?
What happened?
How many times has s/he done that?
When did s/he start doing that?
IMPULSIVITY OR FAILURE TO PLAN AHEAD
Subject acts on impulse without making plans or considering the end result (i.e., quitting a job before having a new job, severing relationships without considering the consequences, taking on responsibilities without any "game plan" for follow through).

Does s/he sometimes do things on impulse?
Or just decide to do things without planning ahead?
Does it cause problems when s/he does this?
Can you give me an example?
Does s/he change plans frequently?
Does that make it difficult for him/her or others?
Has s/he moved without any specific place to go?
Has s/he left a long term relationship without really thinking it through?
What about in the last 3 months?
How many times has s/he done something like that in the last 3 months?
When was the first time s/he acted impulsively like that?

NO PERMANENT ADDRESS
Subject has spent at least a month without a home, moving in with one acquaintance or another, living on the streets or in shelters. Do not include camps, hospital stays, visits with friends, and situations where the expectation is that they can and will return home.

Has s/he ever spent a month or more with no fixed address?
Did s/he move around from place to place? Or live on the street? Or in shelters?

What about the last three months?
What is the longest period of time that s/he lived like that?
When was the first time s/he spent at least a month with no fixed address?

USE OF AN ALIAS
Subject uses another name to fool authority, or gain entree to an opportunity that would not be granted under the subject’s own name, or to avoid responsibilities. Do not code literary (authorial) pseudonyms or simple nicknames.

Did s/he ever used an alias?
Or used another name to either get something or avoid something?

Why was that?
Has s/he used an alias over the last three months?
How many times?
When was the first time s/he used another name for those kinds of reasons?

NO PERMANENT ADDRESS
0 = Retained a permanent address.

**GAMBLING**
Subject makes wagers on card games, sporting events, etc. There is some intimation that this behavior goes beyond playing poker or football pools for minimal amounts with family and friends.

**Does s/he gamble?**

**Does s/he bet at cards?**

**Does s/he bet on football or basketball games?**

**Or horse races or animal fights?**

**Does s/he risk more than $50.00 at a time?**

**How many times would you say s/he has gambled in the last 3 months?**

Conduct Problems
DIFFICULTIES RESULTING FROM NEED TO COVER GAMBLING LOSSES

Subject is unable to cover gambling debts and this has resulted in further difficulties. If the information conforms to the definitions of other items (Failure to Honor Financial Obligations, Neglect or Failure to Care For a Child, Stealing, etc.), code there as well.

Over the last three months, has s/he had any trouble covering his/her gambling losses?

Where does she get the money to pay for his/her gambling debts?

Did s/he had to use his/her savings?
Did s/he had to work extra hours, or an extra job, to raise the money?
Did s/he have to borrow from someone else to cover his/her gambling losses?
Did s/he pay them back?
Has his/her gambling affected his/her ability to cover other expenses?
Was s/he unable to support his/her child because of gambling losses?
Has s/he resorted to stealing to cover gambling losses?
Or dealt drugs to raise the money?
Has anyone been calling him/her, or harassing him/her for payment?
Is s/he in physical danger because you haven't paid your gambling debts?

When was the first time his/her losses caused these other problems?
Definitions and questions

RECKLESS DISREGARD FOR SAFETY OF SELF OR OTHERS
Subject enters into or causes dangerous situations without considering the consequences to self or others. Do not code car accidents that clearly were not the subject's fault.

Has s/he ever been the driver when an auto accident occurred?
What happened?
Has s/he driven a car or motor bike after using alcohol or drugs?
Does s/he like taking risks?
Does s/he do dangerous things?
Can you give me an example?
Why did s/he do that?
Does s/he usually speed when driving a car or motorcycle or 4-wheeler?
When was the first time X put himself/herself or others into a dangerous situation like that?
How often has s/he done dangerous or risky things like that, in the last 3 months?

SPITEFUL OR VINDICTIVE

Spiteful: The child engages in deliberate actions aimed at causing distress to another person.

Vindictive: The child responds to failure to get his/her own way, disappointment, or interpersonal disagreement with adults or peers with deliberate attempts to hurt the other or gain revenge. For instance, by pinching, pushing or attempting to get the other person into trouble.

Do not include behaviors coded under Assault, Cruelty, Bullying, Lying, or Malicious Rumors.

Definitions and questions

**DRINKING DAILY**
5 days per week for a month

*Has there ever been a period when s/he drank 5 or more days per week for a month?*
*When did that start?*
*How about in the last 3 months?*

**SOURCE OF ALCOHOL**
Code the means by which the subject obtained the alcohol drunk without permission.

More than one means may have been employed during the last 3 months, in which case include each one.

**INTERVIEWER CODES PRESENT IF SUBJECT HAS DRUNK ALCOHOL IN THE LAST 3 MONTHS**

*Where did the drink come from?*
*Did s/he ever provide any him/herself?*
*Where did s/he get it from?*
*Has s/he ever stolen alcohol from anywhere?*
*Where from?*
*What about during the last 3 months?*
*Was s/he caught?*
*What happened?*
*What did you do?*

MALADAPTIVE BEHAVIORAL CHANGES

Complete the Maladaptive section on alcohol use meeting criteria as well as any drug meeting criteria.

MALADAPTIVE SCREEN

Alcohol or any drug met criteria for entry into the Maladaptive Section.

Let’s review then...

Was there alcohol use sufficient to enter the Maladaptive section?
Was there any drug use sufficient to enter the Maladaptive section?
Which ones?

IF ANY SUBSTANCE USED DAILY FOR ANY 5 DAY PERIOD DURING THE LAST 3 MONTHS, OR USED ON AT LEAST 10 DAYS, OR SUBJECT HAS BEEN INTOXICATED AT LEAST TWICE, COMPLETE THIS SECTION. POSITIVE CODINGS FOR ADDITIONAL BEHAVIORAL CHANGE(S) ALSO REQUIRE ENTRANCE INTO THE MALADAPTIVE SECTION.

IF ANY SUBSTANCE USED DAILY FOR ANY 5 DAY PERIOD IN LAST 3 MOS, OR USED ON > 10 DAYS OR INTOXICATED 2X, COMPLETE SECTION, OTHERWISE, SKIP TO ""DIAGNOSIS OF PHYSICAL ILLNESS" NOT PRESENT", (PAGE ERROR!
BOOKMARK NOT DEFINED.).
Definitions and questions

**SUBJECTIVE NEED FOR "SUBSTANCE"**
A feeling of need or craving to consume "substance", that is, at least sometimes, intrusive into other thoughts or activities, and cannot always be controlled except through using "substance".

*Does s/he sometimes need "substance" to help him/her get through the day?*

*Does it bother him/her if s/he doesn't have "substance" on any given day?*

*Does s/he crave it?*

*When did that start?*

*How often in the last 3 months?*

*When does s/he have his/her first "substance" of the day?*

*Does s/he miss it if s/he can't get "substance"?*

*What happens if s/he doesn't get "substance"?*

Coding rules

USES "SUBSTANCE" TO IMPROVE MOOD

The subject describes using "substance" in an attempt to relieve dysphoria, anxiety, or irritability, or to induce an increased feeling of well-being.

Does s/he sometimes use "substance" to cheer him/herself up when s/he feels low?

Or to keep him/herself from getting down?

Or to keep from feeling anxious or stressed?

When did that start?

How often does that happen?

Is that usually why s/he uses "substance"?

**TIME SPENT IN "SUBSTANCE" RELATED BEHAVIOR**

Amount of time spent in "substance" related behavior including activities associated with getting and consuming "substance" and recovering from the effects of using "substance".

How much time does s/he spend using "substance"?

Or getting "substance", including locating it, going after it, etc.?

Or getting it ready to use (whatever preparatory measures are appropriate for the substances used)?

Or recovering from the effects of using it (being hungover, sleeping it off, etc.)?

**COST OF SUBSTANCES PER WEEK IN LAST 3 MONTHS**

Has s/he payed for substances in the last 3 months?

How much does s/he spend per week in the last 3 months on drugs and alcohol?

How does s/he pay for his/her use of "substances"?
TOLERANCE

The need for increased intake of "substance" (by at least 50%) to produce previously experienced psychological or behavioral changes associated with "substance" use.

Does s/he need to use more "substance" than s/he used to, to have the same effect?

Is s/he able to tolerate larger amounts of "substance" than s/he used to?

How much more?
When did s/he start to need more?

TOLERANCE

0 = Does not show tolerance.
2 = Needs to use "substance" at least 50% more than previously to obtain desired effect or can tolerate at least 50% more than previously.

OVERCONSUMPTION

Consumption of more "substance" than intended on a particular occasion. If regular overconsumption is present, consider carefully whether the subject's behavior also conforms to the definition of a Narrowed "Substance" Use Repertoire.

Does s/he sometimes use more "substance" than s/he means to?

Like intending to have just one or two, but then using much more?
How often has that happened in the last 3 months?
When did that start?

UNCONTROLLABLE "SUBSTANCE" USE

Episodes in which, whatever his/her original intentions, the subject keeps on using "substance" until unable to use "substance" any more, either because of the unavailability of further "substance" or because of physical incapability (e.g. severe nausea).

Once s/he starts using "substance", does s/he ever find that s/he just can't stop until it's all gone?

Or until s/he physically can't take any more (e.g. because of unconsciousness, vomiting, "sore lungs", etc.)?

Does s/he ever use "substance" just because it's there?

How often does that happen?
When did that start?

Coding rules

UNCONTROLLABLE SUBSTANCE USE

0 = Never unable to resist using "substance" until no further "substance" available or unable to use "substance" any more.

2 = Sometimes unable to stop (3 = Usually (> or equal to 50% of the time) unable to stop until no further "substance" available or unable to use "substance" any more.

NARROWED "SUBSTANCE" USE REPETOIRE

The subject tends to use "substance" in the same way in any situation, even when a particular pattern may be inappropriate. For instance using "substance" heavily when on a first date, or using "substance" as much whether alone or in company. Subject is unable to have a repertoire of substance using behaviors; patterns of heavy use are no longer differentiated by environment.

**Does s/he get high (drunk) (use substance) in inappropriate circumstances?**

Like where?

**Does s/he have different patterns of using "substance" in different situations?**

Does s/he vary how s/he uses "substances" depending on the situation?

When did that start to happen?

Like when s/he goes on a date, as compared with when s/he is with his/her friends?

**Intensity**

0 = No

**Onset**
**MORNING “SUBSTANCE” USE**

Use of “substance” within 2 hours of rising. Take into consideration persons who work shift-work and question “within 2 hours of rising” even if that is not "in the morning".

*Does s/he use “substance” soon after s/he gets up?*

How soon after s/he gets up?  
How often in the last 3 months?  
*Does s/he feel s/he needs it in the morning?*

When did that start?  
Does s/he ever try anything else instead or as a substitute?

Definitions and questions

DISINHIBITED AGGRESSION
After using "substance" the subject has been verbally or physically aggressive in a way that is not characteristic of his/her behavior when not intoxicated.

Has s/he gotten into any arguments when s/he was "high (drunk)"?

When s/he's used a lot of "substance" does s/he get bad-tempered or angry?

More than usual?

How often in last 3 months?

When did that start?

Has s/he gotten into any physical fights when s/he was "high (drunk)" in the last 3 months?

Do you think s/he is more aggressive when s/he uses drugs or alcohol?

5 = Inhalants
6 = Heroin/Opioids/X/Oxy
7 = Hallucinogens
8 = Sedatives

FOR REVIEW ONLY
**DISINHIBITED SEXUALITY**

After using "substance" the subject is sexually provocative, or forward in a way that is not characteristic of his/her behavior when not intoxicated.

*Has s/he made a pass at anyone when s/he was "high (drunk)"?*

*Has s/he tried to pick anyone up when s/he was "high (drunk)"?*

*Has s/he done anything of a sexual nature while drunk or high that s/he would not normally do?*

What happened?
Is that the sort of thing that s/he would do when s/he hadn’t been using "substance"?
How often in the last 3 months?
When did that start?

**POOR JUDGMENT**

After using "substance", the subject shows poor judgment, as defined in the Mania section.

Uncharacteristic behaviors performed with disregard for possible negative consequences.

*Did s/he do anything that s/he regrets?*

*Or anything that seemed really stupid afterwards?*

What?

*How many times in the last 3 months has s/he done something like that? When did that start?*

**LIFE EVENTS**

*Events occurring in the life and environment of the subject.* Life threatening events are events that have caused, or had the potential to cause, death or severe injury. The events should be those in which people actually died or were seriously injured and/or property was extensively damaged, or those events which had the potential to have these outcomes. **MOST EVENTS SHOULD HAVE BEEN NOTED IN THE INTERVIEW BY THIS POINT. FOR EACH EVENT THAT OCCURRED, ASK ABOUT ATTRIBUTION AND PAINFUL RECALL.** IF PAINFUL RECALL PRESENT AS ABOUT AVIODANCE, AND HYPERAROUSAL. 

**Attributions:** Subject states that life event has contributed to a problem or symptom already identified. **Painful Recall:** Subject experiences unwanted, painful and distressing recollections, memories, thoughts, or images of life event. May include repetitive play or trauma-specific reenactment. **Avoidance:** Subject avoids situations, thoughts, or feelings that might provoke painful recall. **Hyperarousal:** Symptoms of anxiety or increased arousal not present before the trauma (or exacerbated by the trauma) that may include difficulty falling or staying asleep, hypervigilance (increased general level of awareness and alertness toward the subject's surroundings, in the absence of imminent danger which may be manifested by an exaggerated startle response, jumpiness, scanning the environment for danger). Some individuals report irritability, anger or difficulty concentrating or completing tasks. **IF PAINFUL RECALL, AVOIDANCE, AND HYPERAROUSAL SCREEN ALL POSITIVE, NOTE ON THE PTSD SCREEN PAGE (CHECKLIST). Definitions and questions

**MOVING HOUSE-AVOIDANCE**
*Do certain things remind him/her of "life event"?*

*What things?*
*Does s/he try to avoid these things/thoughts?*

**MOVING HOUSE-HYPERAROUSAL**
*Since "life event", has s/he been more jumpy or irritable?*

*Has s/he had any trouble sleeping?*
*Has s/he been "on the alert" for bad things happening?*

**CHANGE OF SCHOOL**
Subject changed schools. Change may be routine because subject was promoted (e.g. elementary to middle school, or middle school to high school) or non-routine, either because of moving, family choice, necessity, or expulsion from previous school.

*Has X changed schools in the last 3 months?*

*When did s/he last change schools?*

*Why was that?*
*When did s/he leave the old school?*
*When did/does s/he start at the new school?*
*Will any friends from his/her old school be at the new school?*
*Does s/he know anyone at the new school?*

IF CHANGE OF SCHOOL NOT PRESENT, SKIP TO "LOSS OF BEST FRIEND THROUGH MOVING", (PAGE 22).

VICTIM OF PHYSICAL VIOLENCE (NOT ABUSE)
Subject has been the victim of physical violence, with one or more people using force against the subject with potential to cause death or serious injury. Force may have been used in order to get something (e.g. mugging, robbery), or to intimidate or frighten subject, or for its own sake (assault, fight, torture). Victim may have been threatened with a weapon.

Code physical abuse by family member separately.

Has anyone ever hit or hurt him/her badly?

Has anyone ever robbed or mugged him/her?

Or beaten him/her up really badly?
What happened?
Did they threaten him/her with a weapon?
Why did they do it?
Does s/he know who did it?

When was the first time?

### SEEKING HELP (PHYSICAL ABUSE)

Three forms of supportive response are coded: listening, which could provide social support and emotional relief; personal intervention, which is personally attempting to prevent the reoccurrence of the situation; or intervention involving a professional agency, which might be phoning the police, contacting appropriate services, referring the subject to such services, or removing the subject from what s/he experiences as an unsafe environment. Unsupportive responses include unwillingness to listen, reluctance to get involved, denial of the truth of the story, and threatening the subject if anyone else ever told.

- Someone his/her age?
- A family member?
- An adult outside your family?

**Did s/he help?**

Definitions and questions

VICTIM OF PHYSICAL ABUSE-AVOIDANCE

Do certain things/thoughts remind him/her of "life event"?
Do you try to avoid these things/thoughts?

VICTIM OF PHYSICAL ABUSE-HYPERAROUSAL

Since "life event", has s/he been more jumpy or irritable?
Has s/he had any trouble sleeping?
Has s/he been "on the alert" for bad things happening?

CAPTIVITY

Being held against one’s will (usually by someone older) under circumstances with potential for death, severe physical injury, sexual or physical assault. Include being kidnapped or held hostage. Do not include grounding, time outs, or being required to stay with a non-desired person or in a non-desired setting such as day care, camp, a hospital, or prison.

Has s/he ever been kidnapped?
Or taken as a hostage?
Has s/he ever been locked up against his/her will?

What happened?
Who did it?
How did they treat him/her?
What did they want him/her to do?
How did they make him/her do what they wanted?
How did s/he feel at the time?

SEXUAL ABUSE OR RAPE

Sexual abuse episode(s) in which a person, termed a perpetrator, involves a child or adolescent in activities for the purpose of the perpetrator's own sexual gratification. These activities can include kissing (that makes a person uncomfortable), genital fondling (over or under clothing), oral-genital or oral-anal contact, genital or anal intercourse, or use of instruments. Sexual abuse does not include medical exams or mutually desires sexual relations with a peer.

Rape is a sudden unexpected (usually isolated) event involving non-consensual sexual intercourse.

Has anyone ever touched him/her in places where they shouldn’t?

Has anyone ever touched him/her in ways that made him/her feel funny?

Or seemed wrong to him/her?

Has anyone ever made him/her touch them in ways that made him/her feel uncomfortable?

What happened?
Who was involved?
How did s/he feel about it?
Was s/he upset?
When did it first happen?
How many times has it happened?
Has it happened in the last 3 months?

How about in the last 3 months?

PAINFUL RECALL OF LIFE EVENT - AVOIDANCE

Unwanted, painful and distressing recollections, memories, thoughts, or images of "life event" occurring in response to external cues or stimuli, such as particular sights, sounds, smells or situations.

Does s/he try to avoid any things or places that might remind him/her of "life event"?

Does s/he notice any physical effects when s/he remembers "life event"?

Like his/her heart racing?
Or being short of breath?
Or feeling shaky or sick to his/her stomach?
What does s/he notice?
Does s/he get panicky?

Do other people notice when s/he is remembering event?

What do they see?
When s/he remembers event, what does s/he do to feel better?

Does s/he try to think about other things or do things s/he likes to do to take his/her mind off of it?
Does s/he talk to you or someone else and ask them for help?
Does s/he have a routine of things s/he can think about or do to feel better?

AVOIDANCE

0 = Absent
2 = Avoids situations that might provoke painful recall at least sometimes, but not to a degree that prevents a normal lifestyle.
3 = Avoidance leads to disruption of normal life and activities and results in a highly restricted lifestyle.

NORMAL SUPPRESSION

0 = Absent
2 = Uses normal thoughts or normal activities in attempt to reduce painful recall.

OBSESSITIONAL SUPPRESSION

0 = Absent
2 = Uses obsessional thoughts or obsessional rituals in attempt to reduce painful recall.

COMPULSIVE SUPPRESSION

0 = Absent
2 = Uses compulsive behaviors in attempt to reduce painful recall.

AUTONOMIC EFFECTS

0 = Absent
2 = Notices autonomic changes in response to painful recall, but these do not amount to panic attacks
3 = Panic attacks in response to painful recall

NOTICEABLE TO OTHERS

0 = No
2 = Child reports others notice changes (anxiety, daydreaming, etc.).
Definitions and questions

**PAINFUL RECALL NOT EXTERNALLY CUED**

Recollections not cued by external cues or stimuli.

May be internally cued responses, occurring in response to emotional states, feelings, particular thoughts, autonomic symptoms, bodily sensations, or any other internal cue or stimulus. If internal cues are a response to external stimulus, code as Externally Cued Recollections.

Recollections also may occur without apparent relationship to either external or internal cues or stimuli.

FAILURES OF RECALL
Inability to recall important aspects of the "life event", such as the names and faces of participants, or parts of the chronology of the event.

Do not include deliberate attempts not to recall the event.

Does s/he have difficulty remembering some things about "life event"?

What things are hard to remember?
Is that because s/he don't want to remember them, or that s/he just can't?
How much can s/he remember?
Are those memories real clear?
Has it happened in the last three months?

FAILURES OF RECALL
0 = No failure of recall.
1 = Some difficulty recalling certain aspects of the event that can usually be overcome by concentrated attempt to remember.
2 = At least some aspects of the event cannot be recalled, even with effort.
3 = Most or all details of the event cannot be recalled.

**RELIVING OF LIFE EVENT**

Behaving or feeling as though the "life event" were recurring. The experience may involve a sense of reliving the event, illusory or hallucinatory phenomena, or "flashbacks". Flashbacks involve hallucinatory phenomena of sufficient intensity to impair perception of the real world to a substantial degree.

Include panic attacks where the mental content of the panic episode is related to the "life event".

Include such phenomena even if they occurred at times of intoxication with alcohol or drugs or during sleep cycle.

**CODE NIGHTMARES IN ITEMS THAT FOLLOW.**

*In the last 3 months, has s/he felt as though the "life event" was happening to him/her again, even when it wasn’t?*

- What was that like?
- What did s/he do?
- How long did it last?
- How often did it happen?
- How real did it seem?
- Did s/he feel as though s/he were really there, and that it was really happening again?
- When it was happening was s/he aware of what was really going on around him/her and where s/he really was?
- Did the memory of "life event" seem more real than his/her actual surroundings?

Definitions and questions

NIGHTMARES
Frightening dreams that waken subject, with content related to the "life event" (either about "life event" or reminding subject of it). Unpleasant affect apparent when wakening, which may be followed rapidly by feelings of relief.

In the last 3 months, has s/he had any nightmares or bad dreams about "life event"?

Or nightmares or bad dreams that aren’t about it but remind him/her of it?

Tell me about them.
Do they wake him/her up?

How often do they happen?
When s/he wakes up, does s/he notice any physical effects?
When s/he wakes up is s/he panicky?
Is it hard for him/her to get back to sleep afterwards?
What does s/he do?
Does fear of these dreams make it hard for him/her to get to sleep?
Does s/he have trouble sleeping alone?

Coding rules

NIGHTMARES
0 = Absent
2 = Present

AUTONOMIC EFFECTS
0 = Absent
2 = Notices autonomic changes in response to nightmares.
3 = Has panic attack in response to nightmares.

REASSURANCE
0 = Absent
2 = Upon waking from nightmare, seeks time limited reassurance or contact.
3 = Upon waking, seeks extended reassurance or contact (e.g. won’t go back to bed, conflict arises over need for reassurance).

ANTICIPATORY REASSURANCE
0 = Absent
2 = At bedtime, seeks time limited reassurance or contact (e.g. extended bedtime ritual).
3 = Seeks extended reassurance or contact (e.g. won’t go to bed, conflict arises over need for reassurance).
HYPERAROUSAL

NON-RESTORATIVE SLEEP

Disturbance of usual sleep pattern since "life event" so that subject does not feel rested upon waking and feels tired during the day. Do not include insomnia; sleep is normal but subject feels sleepy during the day.

DO NOT INCLUDE INSOMNIA.

Has s/he been having problems sleeping well in the last three months?

Does s/he feel rested when s/he wakes up in the morning?

Has that changed since "life event"?

Does s/he feel tired during the day from not sleeping well?

How much of the time does s/he feel this way?

Is it worse when s/he has been thinking about "life event"?

NON-RESTORATIVE SLEEP

0 = Absent
2 = Present but does not interfere with functioning.
3 = Present and interfered with functioning.

AROUSAL

0 = Absent
2 = Symptom present 0-25% of the time.
3 = Symptom present 26-50% of the time.
4 = Symptom present 51-75% of the time.
5 = Symptom present 76-100% of the time.

PHASIC EXACERBATION

0 = Absent
2 = Symptom occurs or increases in response to cues prompting recall or reliving of the "life event".
INATTENTION
Difficult maintaining sufficient involvement to allow completion of age-appropriate and developmentally appropriate tasks requiring concentration.

*In the last three months, has s/he had more trouble paying attention than before "life event"?*

*Is it more difficult for him/her to concentrate?*

*Does s/he have trouble remembering things? Has this caused him/her any problems? How much of the time does s/he feel this way? Is it worse when s/he has been thinking about "life event"?*

Definitions and questions

ANGER DYSCONTROL
Increased outbursts of anger have resulting from inability to control expression of anger as well as used to.

In the last three months, has s/he gotten angry very often?

More than before “life event”?
What has happened?
When s/he gets angry, can s/he control his/her anger as much as s/he used to?

What does s/he do now?
Has it affected how s/he gets along with other people?
How so?
How much of the time does s/he feel this way?
Is it worse when s/he has been thinking about “life event”?

HYPERVIGILANCE

Increased general level of awareness and alertness towards surroundings in the absence of imminent danger.

_In the last 3 months, has s/he been more “on the alert” for bad things happening than before “life event”?_

What does s/he do?
Is s/he like that even when there isn’t much chance of anything bad happening?
How much has that affected his/her life?
How much of the time is s/he like that?
Has s/he given up doing any things because s/he doesn’t want to take any chances?

### NUMBING

#### DETACHMENT
A generalized subjective sense of being emotionally cut off from other people that has appeared since the occurrence of a "life event".

**Since "life event" has s/he felt cut off from other people?**

**Has s/he been less interested in seeing his/her friends?**

**Has s/he actually seen less of his/her friends?**

**Can you tell me why?**

**Would s/he like to see more of them?**

**Or has s/he "gone off" on them?**

#### LOSS OF POSITIVE AFFECT
Complaint of loss of a previously existing ability to feel or experience emotion. Code loss of positive and negative affect separately.

**Since "life event" has it seemed as though s/he has lost some of his/her feelings?**

**Has s/he got any feelings left?**

**Can s/he feel happy or good feelings?**

#### LOSS OF NEGATIVE AFFECT
Complaint of loss of a previously existing ability to feel or experience emotion. Code loss of positive and negative affect separately.

**Since "life event" has it seemed like s/he has lost some of his/her unhappy or negative feelings?**

OTHER BEHAVIORS

PLAY RECAPITULATING "LIFE EVENT"
Play involving activities that recapitulate all or some aspects of "life event" (e.g. preoccupation with crashing cars after being in a car accident, or behaviors that mimic "life event").

Has the way s/he plays changed at all since "life event"?
In what way?
In the last 3 months has s/he played games that are like "life event"?
Or acted out what happened?
What does s/he do?

DANGEROUS ACTIVITIES (PTSD - A)
Activities that physically endanger the subject or others.

Since "life event", has s/he taken chances and done risky things?
Or dangerous things?
What has s/he done in the last 3 months? Is this more than before "life event"?

INCREASED ATTENTION TO RELIGION
Increased interest in or observance of religious ideas and practices since "life event".

Has s/he become more religious since "life event"?
Does s/he think more about God?
Or the Devil?
Does s/he go to "church" more often?
Does s/he read "scripture" more often?

PAINFUL RECALL NOT EXTERNALLY CUED

Recollections not cued by external cues or stimuli.

May be internally cued responses, occurring in response to emotional states, feelings, particular thoughts, autonomic symptoms, bodily sensations, or any other internal cue or stimulus. If internal cues are a response to external stimulus, code as Externally Cued Recollections.

Recollections also may occur without apparent relationship to either external or internal cues or stimuli.

In the last three months have any feelings or emotions reminded him/her of "life event"?

Have any physical feelings or changes in his/her body reminded him/her of it?

When that happens, does it bring back unpleasant memories of "life event"?
What are they like?
How often does that happen?
How long does it last?

When that happens, does s/he try not to have those "feelings", so s/he won’t be reminded of "life event"?

Does s/he do anything so as not to have those "feelings" that remind him/her of "life event"?

Does s/he try not to think about "life event"?
Does s/he do anything to stop him/herself thinking about "life event"?
Can s/he stop thinking about it?

ACTIVE RECALL
Intentional recall of event.

Does s/he ever think about "life event" on purpose?
Has s/he in the last three months?
When s/he does so, how does s/he feel?
Are the feelings painful for him/her?
Does s/he get worried?
Or sad?
Or angry?
Or feel guilty?
Does s/he feel better able to cope with what happened?
FAILURES OF RECALL

Inability to recall important aspects of the "life event", such as the names and faces of participants, or parts of the chronology of the event.

Do not include deliberate attempts not to recall the event.

Does s/he have difficulty remembering some things about "life event"?

What things are hard to remember?
Is that because s/he doesn't want to remember them, or that s/he just can't?
How much can s/he remember?
Are those memories real clear?
Has it happened in the last three months?

Coding rules

FAILURES OF RECALL

0 = No failure of recall.
1 = Some difficulty recalling certain aspects of the event that can usually be overcome by concentrated attempt to remember.
2 = At least some aspects of the event cannot be recalled, even with effort.
3 = Most or all details of the event cannot be recalled.

RELIVING OF LIFE EVENT
Behaving or feeling as though the "life event" were recurring. The experience may involve a sense of reliving the event, illusory or hallucinatory phenomena, or "flashbacks". Flashbacks involve hallucinatory phenomena of sufficient intensity to impair perception of the real world to a substantial degree.

Include panic attacks where the mental content of the panic episode is related to the "life event".

Include such phenomena even if they occurred at times of intoxication with alcohol or drugs or during sleep cycle.

CODE NIGHTMARES IN ITEMS THAT FOLLOW.

In the last 3 months, has s/he felt as though the "life event" was happening to him/her again, even when it wasn’t?

What was that like?
What did s/he do?
How long did it last?
How often did it happen?
How real did it seem?
Did s/he feel as though s/he were really there, and that it was really happening again?
When it was happening was s/he aware of what was really going on around him/her and where s/he really was?
Did the memory of "life event" seem more real than his/her actual surroundings?
Did this happen when s/he was falling asleep?
Or waking up?
Does s/he ever wake up in the middle of the night feeling this way?

EXAGGERATED STARTLE RESPONSE
Increase in susceptibility to being startled by minor unexpected stimuli since "life event".

INTERVIEWER SHOULD DEMONSTRATE STARTLE RESPONSE.

In the last 3 months has s/he startled more easily than before "life event"?

Or has s/he been more jumpy than usual?

Do unexpected noises make him/her jump more easily than they used to?
What is it like when that happens?
How often does it happen?

NUMBING

DETACHMENT
A generalized subjective sense of being emotionally cut off from other people that has appeared since the occurrence of a "life event".

Since "life event" has s/he felt cut off from other people?

Have s/he been less interested in seeing his/her friends?

Has s/he actually seen less of his/her friends?
Can you tell me why?
Would s/he like to see more of them?
Or has s/he "gone off" them?

LOSS OF AFFECT - POSITIVE
Complaint of loss of a previously existing ability to feel or experience emotion. Code loss of positive and negative affect separately.

Since "life event" has it seemed as though s/he has lost some of his/her feelings?

Does s/he have any feelings left?
Can s/he feel happy or good feelings?

LOSS OF AFFECT - NEGATIVE
Complaint of loss of a previously existing ability to feel or experience emotion. Code loss of positive and negative affect separately.

OTHER BEHAVIORS

PLAY RECAPITULATING LIFE EVENT
Activity that recapitulates all or some aspects of "life event" (e.g., preoccupation with crashing toy cars after being in a car accident).

Has the way s/he plays changed at all since "life event"?
In what way?
In the last three months has s/he played games that are like "life event"?
Or acted out what happened?
What does s/he do?

DANGEROUS ACTIVITIES
Activities that physically endanger the subject or others.

Since "life event", has s/he taken chances and done risky things?
Or dangerous things?
What has s/he done in the last 3 months?
Is this more than before "life event"?

INCREASED ATTENTION TO RELIGION
Increased interest in or observance of religious ideas and practices since life event.

Has s/he become more religious since "life event"?
Does s/he think more about God?

DECREASED ATTENTION TO RELIGION

Decreased interest in or observance of religious ideas and practices since life event.

Does s/he have less interest in religion since "life event"?

Does s/he care less about God?
Or the Devil?
Does s/he go to "church" less frequently?
Does s/he read "scripture" less?
Or pray less?

OMEN FORMATION

Following the life event, child has developed superstitious beliefs or practices to mitigate or prevent recurrences of the event or other possible or imagined life events.

Is s/he superstitious about things?

Are there signs that mean bad things will happen?

Or signs that make him/her think that s/he’ll be OK?

What are they?

Does s/he think that these signs are really true?
Did s/he believe in them before "life event" or are they new?

Coding rules

DECREASED ATTENTION TO RELIGION

0 = Absent

2 = Subjective report of decreased interest in, or mental attention to, religious matters. Include decreased level of reading religious works here.

3 = Decrease in level of religious observances, including prayer.

OMEN FORMATION

0 = Not present.

1 = Superstitious beliefs not resulting in any overt behavior.

2 = Superstitious beliefs that have resulted in overt behavior (e.g. carrying charms or rabbits feet).

3 = Activities meeting criteria for obsessional rituals or compulsive behaviors.
SURVIVOR GUILT
A subjective belief or feeling of responsibility for the life event or its prevention, or a feeling that the subject should have substituted (or been substituted) for another who was more severely affected.

Does s/he feel guilty about what happened during "life event"?

Does s/he ever feel it was his/her fault, even though it wasn’t?

Does s/he sometimes feel that s/he should have prevented "life event" even though s/he couldn’t?

Does s/he ever wish that s/he and not "specific other person" should have "specific other person’s" fate?

Does s/he ever feel bad about what s/he did during "life event"?

If the child feels guilty or responsible, provide reassurance and comfort.

REVENGE FANTASIES AFTER EVENT
In the last 3 months subject imagined doing something to punish the "cause" of the trauma.

Does s/he still wish that s/he could get revenge or punish "the cause of the trauma"?

Or that something would happen to get back at "the cause"?

What does s/he wish would happen?
**CHANGED EXPECTATION OF LONG-TERM FUTURE**

Marked change in the subject's expectations of the future, involving the expectation that some or all adult roles will NOT be attained. Code regardless of justification, except in the case of subjects with a current life-threatening illness.

- **Has "life event" changed what s/he thinks the future will be like?**
  - In what way?
  - **Has it changed what s/he thinks about getting married?**
  - In what way?
  - **How long does s/he expect to live?**

**DELUSIONS AND DELUSIONAL INTERPRETATIONS**

A delusion is a firmly-held false belief that is out of keeping with the subject's social and cultural background.

A delusional interpretation also has these characteristics, but is an explanation of some other experience (often of other "psychotic" experiences, such as hallucinations) e.g., a subject might interpret hearing voices talking about him as evidence of a police conspiracy. The conspiracy would be a delusional interpretation.

IF THERE IS EVIDENCE OF DELUSIONS OR DELUSIONAL INTERPRETATION, OBTAIN AS FULL AN ACCOUNT OF THE PHENOMENA AS THE PARENT IS ABLE TO PROVIDE.

WRITE THE DETAILS DOWN VERBATIM.

*Does s/he seem to think that people are against him/her?*

Or that people are getting at him/her in some way?

Is there any truth in it, do you think?

What happens if you try to reassure him/her?

*Does s/he have any unusual ideas or beliefs?*

What are they?

Do you think there’s any truth in that?

What happens if you tell him/her that it’s not true?

Can you persuade him/her?
Definitions and questions

**SENSORY CHANGES AND HALLUCINATIONS**

Include changed perceptions, changed perception of time, and hallucinations.

**Changed Perception**

Include here any changes in perception such as heightened and dulled perception. The child may complain that objects change in shape or size or color or that people change their appearance.

**Changed Perception of Time**

The child’s perception of time seems to change, so that events appear to move very slowly or very rapidly or to change their tempo or to be completely timeless. Time may appear to stop altogether.

**Hallucinations**

Hallucinations are false perceptions occurring in clear consciousness. The child may see images, visions, or hear voices in the absence of any real stimulus to the perception. Distinguish from: Illusions, which are false perceptions stimulated by real perceptions that are then momentarily transformed; Hypnogogic and Hypnopompic Hallucinations, which occur only on falling asleep or awakening; Eidetic Imagery, which is never confused with reality by the child; Elaborated Fantasies and Imaginary Companions; Hallucinations occurring only as part of a seizure or in clouded consciousness.

*Does s/he hear imaginary things?*

*Like what?*

*Does s/he hear or see anything that other people don’t?*

*Does s/he notice any funny smells or tastes or feelings when there’s nothing there to explain it?*

*Is s/he really seeing something or do you think it imaginary?*

*Has s/he said that things looked or sounded different?*

*In what way?*
"PSYCHOTIC" ABNORMALITIES OF THOUGHT AND SPEECH

The parent reports that the child's thinking or language has become disordered. Sentences may be hard to follow or completely nonsensical. Ideas may be linked together in unusual ways (such as because of rhymes or puns, as in flight of ideas) or may have no ordinarily comprehensible links (as in "knight's move" thinking).

Distinguish from delusional content or speech; it is quite possible for a child's ideas to be entirely delusional but for the process of thinking and expressing thoughts to be quite normal.

Differentiate from developmental disorders of speech and language (such as language delay and dysarthria) where speech may be difficult to follow. These disorders will usually always have been present and will not represent a change in the child's language.

Has X's speech been unusual or odd?

What about his/her thinking?

What's it been like?
Has that worried you?

IDIOSYNCRATIC BEHAVIOR

The child's behavior has changed idiosyncratically in a way that indicates a marked disturbance of the perception of reality. For instance, the child may dress or walk in extraordinary ways in response to delusions.

Do not include parental reports of the child's behavior changing in ways they disapprove of if any social group to which the child might belong would expect or approve the new behavior.

Has s/he been acting in any strange or unusual ways?

What has s/he been doing?
Has that worried you?
IF ANY EVIDENCE OF DELUSIONS AND DELUSIONAL INTERPRETATIONS OR SENSORY CHANGES AND HALLUCINATIONS, THEN OBTAIN AS FULL AN ACCOUNT OF THE PHENOMENA AS THE PARENT IS ABLE TO PROVIDE, AND COMPLETE "TEMPORAL CO-OCCURRENCE" AND "THEMATIC CONSISTENCY". IF THERE IS NO EVIDENCE, SKIP TO "ANY MEDICATION TAKEN CONTINUE. OTHERWISE", (PAGE ERROR! BOOKMARK NOT DEFINED.).
 TEMPORAL, CO-OCCURRENCE OF DELUSIONS OR HALLUCINATIONS WITH MOOD DISORDER

Extent, onset, and course of delusions or hallucinations are temporally related to the onset and course of mood disorder.

When s/he was (in psychotic state), was s/he miserable or depressed?
Was his/her mood affected in any other way?
Was s/he always like that when s/he was (in psychotic state)?

THEMATIC CONSISTENCY OF DELUSIONS OR HALLUCINATIONS WITH MOOD DISORDER

Judgment of the examiner as to whether the content of the delusional or hallucinatory material is meaningfully related to an abnormal mood state. For instance, delusions of being related to royalty would be congruent with a manic mood state, while nihilistic delusions would be congruent with depression. Pure persecutory delusions should not be rated here.
INCAPACITY SECTION

REVIEW BRIEFLY WITH THE SUBJECT THE AREAS WHERE PROBLEMS OR SYMPTOMS HAVE EMERGED DURING THE INTERVIEW. TAKING ONE AREA AT A TIME, REVIEW THE AREAS OF SYMPTOMATOLOGY TO DETERMINE WHETHER SYMPTOMS IN THAT AREA HAVE CAUSED INCAPACITY. USE THIS, AND INFORMATION COLLECTED THROUGHOUT THE INTERVIEW, TO COMPLETE THE INCAPACITY RATINGS. REMEMBER, YOU NEED ONLY TO ASK THE SPECIFIC QUESTIONS IF YOU HAVE NOT ALREADY COLLECTED THE INFORMATION WHILE COVERING THE APPROPRIATE SYMPTOM SECTION. IF INCAPACITY IS PRESENT FIND OUT WHEN IT BEGAN. REMEMBER TO OBTAIN SEPARATE TIMINGS FOR THE ONSET OF PARTIAL AND SEVERE INCAPACITIES.

SUMMARY OF RULES FOR RATING INCAPACITY

IMPAIRMENT/INCAPACITY

Two levels of disturbance or impaired functioning are distinguished:

Partial Incapacity; refers to a notable reduction of function in a particular area. If a person is still able to do things, but does them less well, or more slowly, then code as a Partial Incapacity.

Severe Incapacity; refers to a complete, or almost complete, inability to function in a particular area.

With the exception of the lifelong symptoms mentioned below, most incapacities require a decrement or change in functioning. The decrement can predate the primary period but must still be present during the primary period.

SYMPTOM DEPENDENCE
For incapacity to be rated it must arise demonstrably from the presence of some particular symptoms or disordered behaviors. For instance, a child who has lost friends because her mother would not allow her to associate with them, would not have that loss of friends rated as an incapacity here. Although, of course, it might have had crippling effects on her social life, it would not count as an incapacity because it was not secondary to any psychopathology of the child. However, it would count if the child was too frightened to leave the house and lost her friends because of it.

The specific area of psychopathology responsible for the secondary incapacity should be noted. It is not enough to record that a child was incapacitated in certain ways and that the child had certain psychopathological problems. The incapacity must be linked to the problems that seem to have generated it. Often this is difficult when children have multiple problems and incapacities, but the attempt should be made nevertheless. However, this does not mean that a particular incapacity has to be assigned to one single problem. It will sometimes be the case that several symptoms of different types will contribute to a particular incapacity. When this is the case, each contributing problem area should be recorded.

It follows that if an incapacity is to be seen as being secondary to other symptoms, then those other symptoms must have been present before the onset of that incapacity. They must also have resulted in a fall-off from a previous level of attainment or proficiency if they are to be regarded as having resulted in an incapacity. Thus a child who had previously been able to function well enough in class might show a reduced ability to participate in group activities, because he felt too miserable to do so. This would be regarded as an incapacity secondary to the affective symptoms. On the other if a child had always been unable to participate in group activities and later became depressed, an incapacity, secondary to depression, would be recorded only if his capacity to participate in group activities suffered a further decrement from its already low level. If there had been no further decrement, an incapacity in relation to depression would not be recorded.
**LIFELONG SYMPTOMS/BEHAVIORS**

In the case of symptoms that have been present throughout life, it will be impossible to show a decrement secondary to the symptoms, because both the symptoms and the putative incapacity will have been present simultaneously. In this situation, provided always that the incapacity can be directly related to the symptoms, it is acceptable to rate it as such. An example might be the social incapacities of a hyperactive child who had always shown such behavior from his earliest years and thus always had disturbed peer relationships.
SUMMARY OF RULES CONT.

SITUATION NOT ENTERED

If the subject has not entered a particular social situation (e.g. daycare/school) during the preceding three months, but there is clear evidence from past experience that incapacity would have been manifested had s/he been in the situation (e.g. discordant peer relationships would have been present) then that incapacity is rated as being present, and its date of onset should be determined. The intensity rating should not be higher than the previously actually occurring highest intensity. Quite often in such a situation, the incapacity will have been contributory to the failure to enter the social situation under consideration.

The incapacitating effects of the psychopathology do not have to be directly due to the behavior of the child but may be mediated by others. For instance, if a boy were excluded from school for constant fighting and trouble making, that would be counted as an incapacitation of school performance just as much as if the child had failed to attend because of his own anxiety about leaving home.

ONSETS

The rules for dating the onset of incapacities are essentially the same as those for dating symptom onsets. That is, the decision is first made as to whether or not a particular incapacity was present during the 3 month primary period. If it was, then its onset is coded as the date it appeared at the minimum criterion level required by the glossary definition. Once again, there is a proviso that if the incapacity has been present only intermittently, the onset is dated from when the incapacity began again following the last period of one year (or longer) without incapacity. The dates of exacerbations from partial to complete incapacity are also recorded.

Even if a child did not code for any problems in a particular section of the PAPA, the Incapacity section can not be skipped. If you have enough information, not every question needs to be asked.
TREATMENT

Referrals to professional agencies or professional concerned with child's symptoms or behavior.

Note the name of the site where treatment was received and the professionals seen.

Treatment may be coded even if symptoms did not code in the PAPA.
PARENTAL RELATIONSHIPS - PARENT #1

A child should be able to maintain relationships with his/her parents that are relatively harmonious and capable of containing positive and nurturant communication. The number of arguments or fights that a subject is involved in is rated separately. A change in the relationships, temporally associated with other symptomatology, should ordinarily be expected in order to rate incapacity.

WITHDRAWAL: Incapacity involving refusal or inability to be involved with, or talk to, parent.

DISCORD: Incapacity involving aggression, arguments, fights, or disruptive behavior.

Does it affect how s/he gets along with you?

How?
What do you do about it?
What does s/he do about it?
Does it cause any arguments?
Can you tell me about the last time it did?

**SCHOOL PERFORMANCE**

Deterioration in classwork is considered to be evidence of an incapacity. A description of things that the child used to be able to do but can no longer is required for a rating here; do not include children whose low intelligence limits their ability to perform at school work and have, therefore, always had poor results.

However, a child that has never been able to perform due to hyperactivity or chronic conduct problems would code if it is clear that these problems contribute to difficulties with school performance.

*What about at school, does...(symptom)... affect how s/he gets along there?*

*Does...(symptom)...affect how well s/he can do his/her lessons?*

*How?*

*Can you tell me about the last time that it did?*

TEACHER RELATIONSHIPS

A deterioration in a child's relationships with his/her teachers is regarded as an incapacity. The need to use increasing levels of disciplinary action, or a withdrawal from contact with teachers with whom the child has previously had good relationships, is evidence of disturbance here.

WITHDRAWAL: Incapacity involving refusal or inability to be involved with or talk to teachers.

DISCORD: Incapacity involving aggression, arguments, fights or disruptive behavior.

Does it affect how s/he gets along with the caregivers/teachers?

PEER RELATIONSHIPS AT SCHOOL
Children should be able to form mutually interested relationships and to undertake activities together (playing, chatting constitute activities in this setting). The loss of friends or withdrawal from peer activities indicates incapacity in this area.

WITHDRAWAL: Incapacity involving refusal or inability to be involved with or talk to peers.

DISCORD: Incapacity involving aggressions, arguments, fights or disruptive behavior.

What about how s/he gets along with other children at daycare/school; does it affect that?

What about friends at daycare/school?
Has it made him/her see friends less than s/he used to? Or try to avoid them? Or do they seem to want to do things with him/her less than they used to? Why is that?

SPARE TIME ACTIVITIES
Normal out of school activities should be reduced by at least one third and to a degree outside their normal range of variation. Care should be taken to ensure that the subject has not lost interest in an activity for no particular reason. That is to say that the reduction in involvement must clearly be a response to some symptomatology.

Does it affect his/her playing time?
Or his/her ability to play either alone or with other kids?

RELATIONSHIPS WITH ADULTS IN SPARE TIME ACTIVITIES

Both withdrawal from such relationships and disturbances of their harmony are evidence to be borne on mind for the purposes of a rating here.

WITHDRAWAL: Incapacity involving refusal or inability to be involved with or talk to adults.

DISCORD: Incapacity involving aggression, arguments, fights or disruptive behavior.

Does it affect how s/he gets along with other people outside the home or school - such as neighbors...or people at (the park, etc.)?

Who?
How?
Can you tell me about the last time that it did?
Has it made him/her see less of other adults?
Or try to avoid them?
Or do they treat him/her differently?
Why?

EMPLOYMENT

Many adolescents have jobs, and they may prove unable to perform these jobs adequately as a result of psychopathology, in which case an incapacity should be recorded as being present as a result of that psychopathology. Their performance of the job must actually be substandard to some degree. It is not enough that the subject should simply describe it as being more difficult or tiring.

*Does s/he have a job?*

*Has that been affected at all?*

MEDICATION
Any medication prescribed by a medical practitioner (either mainstream or alternative) or given by parents or guardian. Do not include analgesics taken less than once per week for sporadic headaches, etc. However, such drugs should be included if they are taken more regularly than this.

Note: Type and daily dose if known for any medication mentioned.

Is s/he on any medication?
Or tablets?
Or anything from his/her doctor?
What?
What is that?

GENERAL SERVICES USE

This page is to be asked of every subject interviewed. The intent is to gather inclusive general information. Detailed Service Forms are not completed on Non-Mental Health related services.

*We have asked you in detail about all services used for emotional, behavioral, or substance related reasons. Now we would like to briefly ask about four services used in general over the last year and over the last 3 months. This will include any services already mentioned plus services used for reasons other than emotional, behavioral or substance related reasons.

SPECIAL SERVICES AT SCHOOL IN THE LAST YEAR

Gather information for the last year.

These questions are about general service use in the last year.

We have asked you in detail about all services used for emotional, behavioral or substance related reasons. Now we would like to briefly ask about five services used in general over the last year and over the last three months. This will include any services already mentioned plus services used for reasons other than emotional, behavioral or substance related reasons.

In the last year has s/he used any student services at school (e.g., career guidance counselor or special services)?

Has s/he used them in the last 3 months?

DEPARTMENT OF SOCIAL SERVICES IN THE LAST YEAR

Gather information for the last year.

In the last year has s/he received any services from DSS (The Department Of Social Services)?

In the last 3 months?
CONTACT WITH COURT OR JUVENILE JUSTICE IN THE LAST YEAR
Gather information for the last year.

In the last 3 years has s/he had any contact with the court or juvenile justice services?

In the last 3 months?

HEALTH PROVIDER IN THE LAST YEAR
Gather information for the last year.

In the last year has s/he made a visit to a health provider (e.g. family doctor, health center, clinic, ER)?

Has s/he been in the last 3 months?

MENTAL HEALTH SERVICES FOR OTHER THAN CHILD’S OWN PROBLEMS IN THE LAST YEAR
Gather information for the last year.

In the last year has s/he been to a mental health center or seen a mental health professional privately for other than his/her own mental health problems (mostly for those of another family member)?

Has s/he been in the last 3 months?
# Attitudes and Barriers to Services

## General Receptivity

The degree to which an individual thinks that professional services for emotional or behavioral problems are generally beneficial and an appropriate response to major problems.

*When people have a serious emotional or behavioral problem, do you think it is a good idea for them to try to get help or treatment?*

*Do you think people like counselors or doctors can help with the kinds of emotional and behavioral problems people have?*

### General Receptivity Codes

<table>

<td>Sees professional services as probably not appropriate for major problems for people</td>
</tr>
<tr>
<td>3</td>
<td>Sees professional services as definitely not appropriate for major emotional or behavioral problems for people</td>
</tr>
</tbody>
</table>

## Personal Receptivity

*Do you think that getting help or treatment for a serious problem would be (has been) a good idea for your child?*

*Would you have liked your child to see someone (someone else) for any problems s/he had in the past 3 months? In the future, if s/he had a major problem, would you want him/her to see someone?*

### Personal Receptivity Codes

PERCEPTION OF BARRIERS TO SERVICE

Subject's statement that certain circumstances or feelings influenced his/her decision to seek treatment for problems or influenced the response to services.

PARENT'S FEAR, DISLIKE, OR DISTRUST OF PROFESSIONALS

Concern or discomfort with using services caused by subject's fear, dislike, or distrust of talking with professionals.

How do you feel about talking with doctors, counselors, or other professionals?

Have you talked with anyone like that about the kinds of problems we have talked about?

Tell me about the last time.

What made you uncomfortable?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:

Were there any times in the past 3 months when your child didn’t get help because of this feeling about "doctors"?

IF SERVICES IN LAST 3 MONTHS, ASK:

Did this "feeling" make a difference when your child got help in the past 3 months?

What difference did it make?
PARENT'S PREVIOUS NEGATIVE EXPERIENCE
WITH PROFESSIONAL(S)
Concern or discomfort with using services caused by subject's previous negative experience with professional(s).

Have you ever had a "bad experience/trouble" with a "professional/provider" that kept you from getting help again?
Tell me about it.

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the past 3 months when your child didn't get help because of "this experience"?

IF SERVICES IN LAST 3 MONTHS, ASK:
Did "this experience" make a difference when your child got help in the past 3 months?
What difference did it make?

PARENT'S SELF-CONCIOUSNESS
Reluctance to use services caused by self-consciousness about admitting having a problem or about seeking help for it. Also inability to talk with anyone about such sensitive issues.

Is it hard for you to talk to others about your child's problem?
Or to ask others for help?
Do you feel embarrassed or self-conscious?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the past 3 months when your child didn't get help because it would be "embarrassing"?

IF SERVICES IN LAST 3 MONTHS, ASK:
Did this "feeling" make a difference when your child got help in the past 3 months?
What difference did it make?
**PARENT'S ANTICIPATION OF NEGATIVE REACTION**
Reluctance to use services caused by anticipation of a negative reaction from family, friends, or others to seeking treatment for an emotional or mental problem.

*Are you concerned about what your family will think about your child’s getting help?*

*Or about what your friends would think?*

*Or about what others would think?*

*What do you think they would say?*

**IF SYMPTOMS IN LAST 3 MONTHS, ASK:**

*Were there any times in the past 3 months when your child didn’t get help because you were “concerned what others would think”?

**IF SERVICES IN LAST 3 MONTHS, ASK:**

*Did “this concern” make a difference when your child got help in the past 3 months?*

PARENT’S ANTICIPATION OF OUT OF HOME PLACEMENT
Reluctance to use services caused by fear that subject’s children might be at greater risk of out-of-home placement.

Were you concerned that your child might be taken from your home?
Or that s/he might have to go live somewhere else?
What did you think might happen?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the last 3 months when your child didn’t get help because of “this concern”?

IF SERVICES IN LAST 3 MONTHS, ASK:
Did “this concern” make a difference when your child got help in the past 3 months?
What difference did it make?

PARENT’S ANTICIPATION OF LOSS OF PARENTAL RIGHTS
Reluctance to use services caused by fear that subject might be seen as an unfit parent and lose parental rights.

Were you concerned that you might not be allowed to look after your children anymore?
What did you think might happen?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:

INCOMPLETE INFORMATION
Difficulty in getting services caused by lack of information about where to get services or how to arrange them.

Did lack of information about who to see make it harder for your child to get services?

Do you think you need more information about who to see about a problem?

How would (did) you try to find out who to see?
Who would (did) you ask about finding the right person to help with problems?
Have you tried to contact anyone for help?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the last 3 months when your child didn’t get help because you didn’t know who to see about the problem?

IF SERVICES IN LAST 3 MONTHS, ASK:
When your child got help in the past 3 months, did you have trouble finding out who to see or where to go?

TIME
Reluctance to use services caused by lack of time to get treatment or to make arrangements for treatment.

Are you concerned about having enough time to get help for your child?

Do you have time to take your child to appointments? Or time to make arrangements?
How much time would be needed?
What would you not be able to do?
Would you have to miss class or work?
Would you have to give up a job or going to school?
Would you miss out on social activities with friends?
Would you have to give up doing things you enjoy?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the last 3 months when your child didn’t get help because of "the time commitment"?

TRANSPORTATION
Reluctance to use services caused by difficulty getting to treatment site.

Is it difficult for you to get to "treatment" location?
How far would you need to go?
What transportation would (do) you need to get there?
Is that available?
Why wouldn’t you use it?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the past 3 months when your child didn’t get help because you “had no transportation and couldn’t get there”?

IF SERVICES IN LAST 3 MONTHS, ASK:
Did transportation make a difference when your child got help in the past 3 months?
What difference did it make?

BUREAUCRATIC DELAY
This item includes bureaucratic hurdles such as excessive pre-visit paperwork or authorizations, difficulty getting an appointment in a timely fashion or being put on a waiting list, or offices where the phone is not answered or calls are not returned.

Have there been difficulties getting services because of "the system"?
Have you had trouble getting through on the phone?
Were you put on a waiting list?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the past 3 months when your child didn’t get help because of "bureaucratic delay"?

IF SERVICES IN LAST 3 MONTHS, ASK:
Did bureaucratic delay make a difference when your child got help in the past 3 months?
SERVICE NOT AVAILABLE
Non-availability of a particular service desired by a subject (such as counseling or drug rehab) because it does not exist in the area where the subject lives.

Are there particular services you would like to use to get help for your child that are not available where you live?

What kind of service?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the past 3 months when your child didn't get help because that service is not available around here?

IF SERVICES IN LAST 3 MONTHS, ASK:
Did availability or existence of services make a difference when your child got help in the last 3 months?

What difference did it make?

REFUSAL TO TREAT
Being refused by the service for various reasons: lack of space/beds, problematic history of subject, fear of liability, etc.

Did any service agency refuse to provide treatment for your child?

What was the reason given? What do you think was the reason?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:
Were there any times in the past 3 months when your child didn't get help because s/he was refused treatment?

IF SERVICES IN LAST 3 MONTHS, ASK:
Did this refusal to treat make a difference when your child got help in the last 3 months?

What difference did it make?
CHILD OR PARENT REFUSES TREATMENT

The subject refused to go for treatment for which s/he was referred by a professional; or, the spouse/partner refuses to allow the subject's participation.

Has s/he refused to go to any treatment services?

Have you refused to allow him/her to get treatment?

What was the reason?

IF SYMPTOMS IN LAST 3 MONTHS, ASK:

CHILD AND ADOLESCENT IMPACT ASSESSMENT
ADMINISTRATION OF THE CAIA

This is the point during the interview for the interviewer to decide whether to administer the CAIA. It is essential to do the CAIA if any impairment or symptom coded.

If any of the below are true or there is any doubt, administer the CAIA. (If you decide when you are coding, after the interview, that there were no codings whatsoever in the PAPA you may "S" the CAIA.)

If a "Life Event" codes, but there is no "Painful Recall", you need not complete the CAIA solely on the basis of that event. If "Painful Recall" is present, do the CAIA.
ECONOMIC BURDEN

If services received in the last three months, ask expenses. Otherwise, skip to "Loss of Income".

EXPENSES

The monetary expenses associated with getting services for child's emotional or behavioral problems. Include costs of medication.

Do not include income lost because of child's problems, which is coded under "Loss of Income".

Have there been any expenses associated with getting help for your child?

Have the costs of getting help for your child's problems had an impact on family budget for other things?

Are they causing any restrictions elsewhere?
Do you have savings to cover them?
Have you had to work extra hours?
Have you or anyone else had to take an additional job?

Have you gone into debt to cover these expenses?
Are you concerned about being able to pay back these expenses?

IF SERVICES NOT RECEIVED IN THE LAST THREE MONTHS, SKIP TO "LOSS OF INCOME", (PAGE 3).
