DESCRIPTION

Criteria for Agoraphobia

Note: Agoraphobia is not a codable disorder. Code the specific
disorder in which the Agoraphobia occurs (e.g., 300.21 Panic Disorder
With Agoraphobia [p. 402] or 300.22 Agoraphobia Without History of
Panic Disorder [p. 404]).

A. Anxiety about being in places or situations from which escape
might be difficult (or embarrassing) or in which help may not be
available in the event of having an unexpected or situationally
predisposed Panic Attack or panic-like symptoms. Agoraphobic fears
typically involve characteristic clusters of situations that include
being outside the home alone: being in a crowd or standing in a
line: being on a bridge: and traveling in a bus, train, or automobile.

Note: Consider the diagnosis of Specific Phobia if the avoidance
is limited to one or only a few specific situations, or Social
Phobia if the avoidance is limited to social situations.

B. The situations are avoided (e.g., travel is restricted) or else are
endured with marked distress or with anxiety about having a Panic
Attack or panic-like symptoms, or require the presence of a
companion.

C. The anxiety or phobic avoidance is not better accounted for by
another mental disorder, such as Social Phobia (e.g., avoidance limited
to social situations because of fear of embarrassment), Specific
Phobia (e.g., avoidance limited to a single situation like elevators),
Obsessive-Compulsive Disorder (e.g., avoidance of dirt in someone with
an obsession about contamination), Posttraumatic Stress Disorder (eg. avoidance of stimuli associated with a severe stressor), or Separation Anxiety Disorder (eg. avoidance of leaving home or relatives).

SAMPLE INTERVIEW SECTION

Definitions and questions

AGORAPHOBIA
Subjective Anxious Affect specific to open spaces or crowds.

*Is s/he afraid in open spaces?

*Or going out in crowded places?

*Or using public transportation?

Does it frighten her?
Can s/he stop him/herself from being afraid?
Does s/he do anything to avoid it?
Has it affected what s/he does?
What effect has it had?

ANIMAL FEARS
Subjective Anxious Affect specific to certain animals.
Do not include fears of spiders, insects, snakes, or birds.

*Do any animals frighten him/her?

Which?

Why is s/he frightened of them?

What does s/he do about it?

Does s/he try to avoid them?
AGORAPHOBIA

Subjective anxious affect specific to open spaces or crowds. Typical places and situations relevant to agoraphobia include being outside the home alone, being in a crowd, standing in line, traveling on public transport or by automobile.

Distinguish from acrophobia (fear of heights) when fear of being on bridges etc. is described.

Distinguish from separation-related anxieties and worries, where the central fears or worries concern separation from attachment figures. When there is doubt as to the correct coding in such a case, code both the appropriate separation-related symptoms and agoraphobia and complete the coding indicating possible overlap with separation-related symptoms.

0 = Absent

2 = Agoraphobia is intrusive into at least two activities and uncontrollable at least some of the time.

3 = Agoraphobia is intrusive into most activities and nearly always uncontrollable.

4 = The child has not been in the anxiety provoking situation during the past 3 months because of avoidance, but the parent reports that the anxious affect would have occurred if the child had been in such a situation.

SUBTYPE: AGORAPHOBIA MAY OVERLAP WITH SEPARATION-RELATED SYMPTOMS

Anxiety and/or worry may be associated with separation from attachment figures.

0 = Absent

2 = Present

CAPA glossary notes.

AGORAPHOBIA

Subjective Anxious Affect specific to open spaces or crowds.

2 = Agoraphobia is intrusive into at least two activities and uncontrollable at least some of the time.
3 = Agoraphobia is intrusive into most activities and nearly always uncontrollable.

4= The subject has not been in the anxiety provoking situation during the past 3 months because of avoidance, but reports that the anxious affect would have occurred if s/he had been in such a situation.

SAMPLE INTERVIEW SECTION

Child and Adolescent Psychiatric Assessment

Definitions and questions

**AGORAPHOBIA**

Subjective Anxious Affect specific to open spaces or crowds.

*Is s/he afraid in open spaces?*

*Or going out in crowded places?*

*Or using public transportation?*

Does it frighten her?
Can s/he stop himself/herself from being afraid?
Does s/he do anything to avoid it?
Has it affected what s/he does?
What effect has it had?

**ANIMAL FEARS**

Subjective Anxious Affect specific to certain animals.

Do not include fears of spiders, insects, snakes, or birds.

*Do any animals frighten him/her?*

Which?

Why is s/he frightened of them?

What does s/he do about it?

Does s/he try to avoid them?

**Coding rules**

**AGORAPHOBIA**

2 = Agoraphobia is intrusive into at least 2 activities and uncontrollable at least some of the time

3 = Agoraphobia is intrusive into most activities and nearly always uncontrollable

4 = The subject has not been in such a situation during the last 3 months because s/he avoided it, but knows that anxious affect would have occurred if s/he had been in situation.

**AVOIDANCE**

2 = Subject has developed routines that allow him/her to adopt a relatively normal lifestyle while avoiding feared situation

3 = Subject lives a highly restricted life because of feared situations

**FEAR OF ANIMALS**

2 = Fear of animals is intrusive into at least 2 activities and uncontrollable at least some of the time

3 = Fear of animals is intrusive into most activities and nearly always uncontrollable

4 = The subject has not been in such a situation during the last 3 months because s/he avoided it, but knows that anxious affect would have occurred if s/he had been in situation.

**AVOIDANCE**

2 = Subject has developed routines that allow him/her to adopt a relatively normal lifestyle while avoiding feared situation

3 = Subject lives a highly restricted life because of feared situations
AGORAPHOBIA
