Introduction

The DSM-IV ODD symptom criterion includes a note stating “Consider a criterion met only if the behavior occurs more frequently than is typically observed in individuals of comparable age and developmental level.” This raises the issue of how often ODD behaviors occur in most people, or alternatively, how often is “often.” In 1996, Drs. Angold and Costello published an article presenting rates of ODD behaviors in the first wave of the GSMS sample and proposed frequency cutoffs based upon the 90th percentile frequencies. This general rule (i.e., >90th percentile) has been incorporated into the SAS code for PAP/CAPA/YAPA ODD. The table below displays the original rates published in the 1996 article, the rates when using all GSMS CAPA waves, and the rates for GSMS YAPA waves at ages 19 and 21.

SAMPLE INTERVIEW SECTION

Definitions and questions

LOSING TEMPER
Discrete episodes of temper manifested by shouting or name calling but without violence and not meeting criteria for a temper tantrum.

What sort of temper has s/he got?

What happens when s/he loses his/her temper?

How often does s/he lose his/her temper? When did that start?

IF A CHILD HAS DESTRUCTIVE TANTRUMS, ASK SEPARATELY ABOUT THE FREQUENCY AND DURATION OF NONDESTRUCTIVE AND DESTRUCTIVE (LEVEL 3) TANTRUMS.
How often does s/he have a tantrum?
Where do the tantrums happen?
How often has s/he had a tantrum at home in the last three months?
How about at school?
Or elsewhere like at a store?

How long does that tantrum last, that is, how long does it take him/her to return to his/her usual self?

What seems to trigger his/her tantrums?
Does s/he seem to have tantrums when s/he is tired?
Or frustrated?
What transitions, such as stopping playing to go on an errand?
Or going to bed?
Do changes in routine trigger tantrums?
Do his/her tantrums ever seem to come "out of the blue" with no clear cause or trigger?

### CONDUCT PROBLEMS INVOLVING VIOLENCE

#### LOSING TEMPER

Discrete episodes of temper manifested by shouting or name calling but without violence and not meeting criteria for a temper tantrum.

*What sort of temper have you got?*

*What happens when you lose your temper?*

*How often do you lose your temper? When did that start?*

#### TEMPER TANTRUMS

Discrete episodes of excessive temper, frustration or upset, manifested by shouting, crying or stamping, and involving violence or attempts at damage directed against people or property.

Violence or damage done here does not constitute Vandalism or Assault.

*Do you ever get into a tantrum?*

What do you do?

Tell me about the last time.

What do your parents (caretakers) do about it?

How long does it go on for?

How often does it happen?

When did it start?

N.B. INFORMATION OBTAINED HERE MAY ALSO BE RELEVANT TO TOUCHY OR EASILY ANNOYED (PAGE 96), ANGRY OR RESENTFUL (PAGE 98), AND IRRITABILITY (PAGE 97).

GLOSSARY NOTES

(Notes from PAPA Glossary)

TEMPER TANTRUMS

Discrete episodes of excessive temper, frustration or upset, manifested by shouting, crying or stamping, and/or involving violence or attempts at damage directed against oneself, other people, or property.

Violence or damage done here does not constitute Vandalism or Assault.

0 = Absent

2 = Discrete episodes of temper without violence.

3 = Non destructive violence directed only against property (e.g. throwing toys; hitting walls, etc.).

4 = With destructive violence (e.g. breaking toys) or violence against self or others (e.g. hitting, biting, head banging).

STAMPING FEET

TRIGGERS FOR TEMPER TANTRUMS

May code up to four

S = Not applicable
1 = Frustration: Tantrums occurring as a result of the child’s not being allowed or able to do what s/he wants to do
2 = Fatigue: Tantrums resulting from the child’s being “over tired”
3 = “Out of the blue”: Tantrums occurring without any apparent precipitants
4 = Other

DURATION OF AVERAGE TANTRUM

LENGTH OF TIME TO RECOVERY

Average length of time until child returns to status quo emotional state.

ONSET OF TEMPER TANTRUMS

WITH PARENT #1

WITH PARENT #2

WITH OTHER PARENT #1

WITH OTHER PARENT #2

WITH BABYSITTER IN HOME

WITH CAREGIVERS/TEACHERS AT DAYCARE/SCHOOL

WITH OTHER ADULTS

ARGUMENTS - WITH ADULTS

An argument is a negative verbal dispute in which there is strong disagreement or difference of opinion. An argument involves an interaction, or attempted interaction, between two people. An argument begins with a verbal exchange. The PAPA definition of argument implies anger and some form of verbal aggression (raised voices, name calling, taunting) or physical aggression directed towards the person the child is arguing with.

There are elements in common between temper tantrums and arguments. Temper tantrums may be triggered or preceded by an argument but once a tantrum starts, it almost has a "life of its own" that does not involve interaction or exchange with another person. It is a "display of temper". Physical aggression can be a common element to temper tantrums and arguments. Certainly, arguments and temper tantrums can both be coded.

Note: In order to distinguish from normative assertions of autonomy, persistence and intransigence need to be determined.

Does X argue with adults a lot?

Does s/he disagree with you in a negative, angry, or defiant way?

Does s/he shout?
Name call?
Does s/he become physical during the argument?
How often does s/he argue at home?
Or daycare/school?
Or elsewhere?
When did s/he start arguing so much?

IF NO SIBLINGS, SKIP TO "ARGUMENTS - WITH PEERS", (PAGE 11).
**NUMBER OF ARGUMENTS WITH PARENT #1**

An argument is defined as a disagreement, lasting at least 5 minutes, that results in a dispute involving raised voices, shouting, verbal abuse, or physical aggression or fights.

**“Do you have arguments with parent #1?**

Tell me about the last time.

How long do these arguments last?

How many arguments have you had with parent #1 over the last three months?

Did the arguments ever get physical?

What happened?

**“Have you “hit” your “parent #1” over the last three months?”**

## SAMPLE INTERVIEW SECTION

### Definitions and questions

**RULE BREAKING**
Violation of standing rules at home daycare/school or at elsewhere.

**Do you have some clearly stated rules in your family?**
Such as "no food in the living room?"
Or "no writing on the walls?"
Or "an hour of TV a day?"
Or "no hitting?"

**Does s/he understand these rules?**

**How well does s/he follow your family's rules?**

**What sort of rules does s/he break?**

**Tell me about the rules s/he breaks.**

**How good is s/he at obeying the rules at daycare/school?**

**Do the teachers or caregivers describe him/her as a troublemaker?**

**What sort of rules does s/he break?**

**How do you hear about it?**

**Does s/he break the rules anywhere else?**

**Tell me about the last time that happened.**

**When did s/he start to break rules at home, daycare/school and/or elsewhere?**

OPPOSITIONAL/CONDUCT DISORDER

OPPOSITIONAL BEHAVIOR

REMEMBER TO GET EXAMPLES AND BEHAVIORAL DESCRIPTIONS

RULE BREAKING
Violation of standing rules at school or elsewhere but NOT at home.

N.B. “Rule-breaking” at home is rated as disobedience since families do not have formal rules.

Do not include breaking laws or violating parole.

*How good are you at obeying the rules at school?
*What happens if you don’t?
*What sort of rules do you break?
*Do you break the rules anywhere else?
Tell me about the last time that happened.

Do you get into trouble?

How often do you break the rules?

When did you start breaking rules?

Do you do it on your own or with other people?

RULE BREAKING

2 = If the child breaks rules relating to at least 2 activities, and at least sometimes responds to admonition by public failure to comply.

3 = If rule breaking occurs in most activities and the child sometimes responds to admonition by disputing or challenging the authority of the person admonishing him/her

SCHOOL

ELSEWHERE

SOLITARY/ACCOMPANIED

0 = Solitary

2 = Often accompanied (25-49% of the time)

3 = Accompanied 50% or more of the time
(Notes from PAPA Glossary)

FAMILY HAS RULES
The parent perceives the family as having standing rules for behavior, to which the child is expected to adhere.

U = Child doesn’t understand the concept of rules at home
0 = Absent
2 = Present

If the family does not have rules, or if the child does not understand the concept of rules at home, the interviewer proceeds to consideration of rules at daycare/school or elsewhere.

RULE BREAKING
Violation of standing rules at home, at daycare/school or elsewhere.

0 = Absent

U = The child does not understand the concept of rules at daycare/school or elsewhere
2 = The child breaks rules relating to at least 2 activities at home, daycare/school, or elsewhere and at least sometimes responds to admonition by public failure to comply
3 = Rule breaking occurs in most activities at home, at daycare/school, or elsewhere and the child sometimes responds to admonition by disputing or challenging the authority of the person admonishing him/her

DISOBEEDIENCE

Refers to failures to carry out specific instructions when directly given. Differentiate from rule-breaking, which refers to violation of formal standing rules.

2 = Disobedience occurs in at least two activities.
3 = Disobedience occurs in most activities.

If Disobedience is present, the presence or absence of defiance (disputing or challenging instructions or requests) is assessed.
When a child's behavior meets criteria for both Rule Breaking and Disobedience, both can be coded. The violation of a standing rule and the negative interaction between the child and an authority are considered to be two different components of the same behavior.

Having established disobedience, the parent’s perception of scale score frequency of disobedience with different parental figures, caregivers/teachers, and other adults is noted.

**EVER ASKED TO LEAVE DAYCARE/SCHOOL BECAUSE OF RULE BREAKING OR DISOBEDIENCE**

Child sent home (or “parent” requested to take child home) from daycare/school because of rule breaking or disobedience.

Distinguish from other reasons such as fighting or assaults that may have caused the child to be asked to leave daycare/school and which are coded separately.

**EVER: ASKED TO LEAVE DAYCARE/PRESCHOOL**

0 = No
1 = Preschool/daycare have threatened exclusion of the child, but have not taken action on this threat.
2 = Asked to leave temporarily
3 = Asked to leave permanently

________________________________________________________________________________

(Notes from CAPA Glossary)

**RULE BREAKING**

Violation of standing rules at school or elsewhere but NOT at home. Breaking laws and/or probation violations do not count here.
2 = The child breaks rules relating to at least 2 activities, and at least sometimes responds to admonition by public failure to comply.
3 = Rule breaking occurs in most activities and the child sometimes responds to admonition by disputing or challenging the authority of the person admonishing him/her.

N.B. "Rule-breaking" at home is rated as disobedience since families usually do not have formal rules.

**DISOBEDIENCE**

Refers to failures to carry out specific instructions when directly given. Differentiate from rule-breaking, which refers to violation of formal standing rules.
2 = Disobedience occurs in at least two activities.

3 = Disobedience occurs in most activities.

When a child's behavior meets criteria for both Rule Breaking and Disobedience, both can be coded. The violation of a standing rule and the negative interaction between the child and an authority are considered to be two different components of the same behavior.

Definitions and questions

**ANNOYING BEHAVIOR**

Indulgence in active behaviors that annoy or anger peers, siblings, or adults. The child’s intention need not be to annoy, but the behaviors would obviously annoy their recipient.

Do not include annoying behaviors that are the result of unintentional acts, for instance, annoyance caused by clumsiness, or failure to understand the rules of games.

Do not include behaviors that conform to the definitions of Rule Breaking and Disobedience.

*Do you find that other people get annoyed by things you do?*

Like what?

*Do you ever do things deliberately to annoy other people?*

*Or do you find that people get annoyed because of things you do for fun?*

What happens? Can you tell me about the last time?

Where do you do those sorts of things?

How often does something like that happen?

When did it start?

Coding rules

**ANNOYING BEHAVIOR**

2 = Annoying behavior occurs for at least 2 activities, and child is at least sometimes unresponsive to admonition.

3 = Annoying behavior occurs in most activities and the child sometimes responds to admonition by disputing or challenging the authority of the person admonishing him/her.

GLOSSARY NOTES

(Notes from PAPA Glossary)

ANNOYING BEHAVIOR

Indulgence in active behaviors that annoy or anger peers, siblings, or adults. The child's intention need not be to annoy, but the behaviors would obviously annoy their recipient. Do not include annoying behaviors that are the result of unintentional acts, for instance, annoyance caused by clumsiness, or failure to understand the rules of games. Do not include behaviors that conform to the definitions of Rule Breaking and Disobedience. Do not code the specific annoying behavior of teasing here but in following item.

0 = Absent

2 = Annoying behavior occurs in at least 2 activities and child is at least sometimes unresponsive to admonition.

3 = Annoying behavior occurs in most activities and the child sometimes responds to admonition by disputing or challenging the authority of the person admonishing him/her.

SAMPLE INTERVIEW SECTION

Definitions and questions

DECEPTION

LYING
Distortion of the truth with intent to deceive others.

*Most people tell lies sometimes. What sorts of lies have you told in the last 3 months?
What about?
Who to?

Why did you do it?
Was it to get out of trouble?

Where do you tell lies?

How often do you tell lies?

When did you start telling lies?

*Do you ever tell lies to get out of things you don’t want to do?

*What happens when you’re caught doing something wrong?

*When something goes wrong that’s your fault, do you admit it?

BLAMING

*Do you lie if you think you can get out of something by blaming someone else?

*Do your lies get others into trouble?
Could they?
What do you do?

What was the result?

How often do you do this?
When did you start doing it?

Coding rules

LYING

0 = No
2 = Lies told for gain, or to get out of school attendance etc., or to escape punishment, in at least 2 activities that do not result in others getting into trouble.

HOME

SCHOOL

ELSEWHERE

SOLITARY/ACCOMPANIED

0 = Solitary
2 = Often accompanied (25-49% of the time)
3 = Accompanied 50% or more of the time

BLAMING

0 = No
2 = Lied in at least two activities, that result in others being blamed for subject’s misdemeanors or otherwise getting into trouble, or lies which, if believed, would have the same result.

SAMPLE INTERVIEW SECTION

Definitions and questions

TOUCHY OR EASILY ANNOYED

The child is generally more prone to feelings of anger, bad temper, short temper, resentment, sulking or annoyance, under minor provocation than most children. This pattern need not represent a change in behavior.

"Do things get on your nerves easily?"

What sorts of things?

"Do you get annoyed more easily than most people, do you think?"

What do you do?
How often does that sort of thing happen?
How long have you been like that?

ANGRY OR RESENTFUL

The child is generally more prone to manifestations of anger or resentment (such as snappiness, shouting, quarrelling or sulking) under minor provocation, than most children.

This pattern need not represent a change in behavior.

"Do you get angry very often?"

How often?
What happens?
How often does that happen?

"Do you get "sulky" or "pout"?"

How often?
What do you do?
How often does that happen?
How long have you been like that?
GLOSSARY NOTES

(Notes from PAPA Glossary)

TOUCHY OR EASILY ANNOYED

The child is generally more prone to feelings of anger, bad temper, short temper, resentment, sulking, or annoyance, under minor provocation than most children. This pattern need not represent a change in behavior.

0 = Absent
2 = Present

(Notes from CAPA Glossary)

TOUCHY OR EASILY ANNOYED

The child is generally more prone to feelings of anger, bad temper, short temper, resentment, sulking, or annoyance, under minor provocation than most children. If the frequency equals three or more under minor provocation, code 2. If the frequency equals less than 3, code 0.

This pattern need not represent a change in behavior.

0 = Absent
2 = Present

GLOSSARY NOTES

(Notes from PAPA Glossary)

SPITEFUL OR VINDICTIVE

Spiteful: The child engages in deliberate actions aimed at causing distress to another child or adult.

Vindictive: The child responds to failure to get his/her own way, disappointment, or interpersonal disagreement with adults or peers with deliberate attempts to hurt the other or gain revenge. For instance, by pinching, biting or attempting to get the other person into trouble.

Do not include behaviors coded under Assault, Cruelty, Bullying, or Lying

0 = Absent
2 = Present

(Notes from CAPA Glossary)

SPITEFUL OR VINDICTIVE

The child responds to failure to get his/her own way, disappointment, or interpersonal disagreement with adults or peers with deliberate attempts to hurt the other or gain revenge. For instance, by pinching, biting, or attempting to get the other person in trouble.

Do not include behaviors coded under Lying, Malicious Rumors, Assault, Cruelty, or Bullying.

0 = Absent
2 = Present

One difference between Annoying Behavior and Spiteful Or Vindictive, is that the intent is to make the recipient angry for the former and miserable for the latter.

These two items are considered less specific than Rule Breaking or Disobedience, so that if a behavior meets criteria for both Annoying Behavior and Disobedience, but was not specifically intended to annoy, it should be rated under Disobedience. However, if the child's intention was to annoy, then this would be rated under Annoying Behavior and Disobedience, since these two items would then refer to separate components of the behavior. It is also possible to "double-code" a
behavior in which several dynamics are included; for instance, the child was both disobedient to the teacher and annoying to another child during the same behavior.

**Description**

**Symptom Variable(s)**

**Glossary Notes**

**Additional Variables**

**N, Weighted Prevalence, and Missing Data**

**Citations**

**SAS CODE**

---

**DESCRIPTION**

---

DSM-IV definition:

A. A pattern of negativistic, hostile, and defiant behavior lasting at least 6 months, during which four (or more) of the following are present.

- (1) often loses temper.
- (2) often argues with adults.
- (3) often actively defies or refuses to comply with adults requests or rules.
- (4) often deliberately annoys people.
- (5) often blames others for his or her mistakes or misbehavior.
- (6) is often touchy or easily annoyed by others.
- (7) is often angry and resentful.
- (8) is often spiteful or vindictive.

Note: Criterion only met if the behavior occurs more frequently than is typically observed in individuals of comparable age and developmental level.

B. The disturbance in behavior causes clinically significant impairment in social, academic, or occupational functioning.

C. The behaviors do not occur exclusively during the course of a Psychotic or Mood disorder.

D. Criteria are not met for Conduct Disorder, and, if the individual is age 18 years or older, criteria are not met for Antisocial Personality Disorder.

Informant: PAPA- Parent only.
CAPA- Parent and child either/or rule.
YAPA- Self-report.
Note: ODD is coded according to criteria A and B. Apply criteria C and D as necessary.

GLOSSARY NOTES

(Notes from PAPA Glossary)

Consider the DSM-IV diagnosis of oppositional defiant disorder (p93-94). Eight symptoms are to be considered and four must be present in order for the diagnosis to be given. The second criterion is A often argues with adults®. It would seem that the clinician (or computer diagnostic algorithm) must make several judgments in order to determine whether this criterion is met: (1) Does the child manifest the behavior Aarguing with adults®? (2) How often does the child manifest that behavior? (3) Is that frequency enough to be called Aoften®. The first question involves a categorical decision about whether the child manifests any behavior that might be called Aargument®. The second of these questions involves a dimension and the third the imposition of a cut point on that dimension. All of the criteria for oppositional disorder involve the same basic format. That is, all of them require the diagnostician to jump back and forth between categorical and dimensional judgments. Once all the criterial symptoms have been assessed, the number of positives must be counted and if their sum is four or more then the diagnosis is given. Once again, a dimension (number of symptoms) is being constructed and then reduced to a category by means of a cut point.
