

Training Costs for CAPA, PAPA, or YAPA

What is the cost of training for CDE Interviews and what does it include?

Interview training takes four (4) didactic days. We send our trainer, Brian Small, to train your interviewers at your location. The measures, like all structured interviews, are fairly intensive with a fairly steep learning curve but the outcome being rich data. There are also core measures that have been developed that include diagnostic criteria available.

1. Training is \$500 per day plus travel days.
2. Airfare and accommodations during visit (cost of food and transportation).
3. **Optional Service:** Trainer will thoroughly check an interview and provide a written feedback report for \$250 per checked interview. Depending on the size of your group, it is beneficial to receive this feedback on 1-2 interviews per interviewer.

Training Agenda

Day 1: Introduction to interview (CAPA, PAPA, or YAPA). Review and discuss selected modules for your interview. This is an interactive discussion of definitions, probes, and coding rules.

Day 2: Review and discuss selected modules for your interview.

Day 3: Finish any discussion of modules. Complete a mock interview. Trainees will interview trainer. This is an interactive interview with all interviewers taking part. The interview will be a realist mock interview of a typical interview that you would expect in the field.

Day 4: Code mock interview. If using eMeasures, interviewers will code mock interview on tablet. In interview will be completed on paper, you must supply your interviewers with a printed paper version of interview. Trainer will supply a Word version of your interview to print.

Sample Agenda

This is just a sample agenda that you can expect. Actual agenda would depend on instrument and modules chosen.

Day 1 Agenda

1. 9:00 a.m. Introduction to the PAPA slide show. A short comparison of the PAPA to other assessments. Detailed information on the components and administration of the PAPA.
